

Kiro is a generative artificial intelligence (AI) powered conversational assistant that can help you understand, build, extend, and operate AWS applications. In the workshop [AWS IAM Identity Center configuration updates](#), we already created an Identity Center instance with a username - qdev

1. Navigate to [Workshop studio output page](#)
2. Goto the provided IDC-ss0-startur1, take note of IDC-passwordotp, this will be use later duing the password reset process.

Event Outputs (7)				
Q Search				
		< 1 >		
Key	Value	Stack name	Description	Type
IDC-passwordotp	1P2S9HKQYrg&Cn%cS?2imWsy&w*H9deQblv	idc	Identity Center PasswordOTP	export
IDC-region	us-east-1	idc	Identity Center Region	export
IDC-ss0-starturl	https://d-awsapps.com/start	idc	Identity Center start url	export
IDC-useremail	qdev@example.com	idc	Identity Center User Email	export
IDC-username	qdev	idc	Identity Center Username	export
VSCode-Password		vscode-server	VSCode Server Password	export
VSCode-ServerURL	https://cloudfront.net/?folder=/Workshop	vscode-server	VSCode Server URL	export

3. Go thru password reset process. ⚠ Make sure your new password meet the following criteria:
 1. Contain 8-64 characters
 2. Uppercase & lowercase letters
 3. Numbers
 4. Non-alphanumeric characters

4. After resetting password, you can login by using qdev and your new password You have navigated to the AWS access portal

You have navigated to the AWS access portal

After your administrator gives you access to applications and AWS accounts, you can find them here.

5. You will see QDefaultProfile under the Applications tab.

AWS access portal
