Event ends in 1 day 4 hours 13 minutes.

Access VSCode Server terminal

▶ **Troubleshooting**

Login to Kiro CLI and start Kiro Chat

1. Login to Kiro CLI

```
kiro-cli login --use-device-flow
```

Select login method · `Use with IDC Account`

Output:

```
✓ Select login method · Use with IDC Account
✓ Enter Start URL · https://d-906613033f.awsapps.com/start
✓ Enter Region · us-east-1

Confirm the following code in the browser
Code: GFZW-GPSQ

Open this URL: https://d-906613033f.awsapps.com/start/#/device?user_code=GFZW-GPSQ
■■■□□□□□ Logging in...
```

```
participant:/Workshop$ kiro-cli login --use-device-flow
✔ Select login method · Use with IDC Account
✔ Enter Start URL · https://d-906613033f.awsapps.com/start
✔ Enter Region · us-east-1

Confirm the following code in the browser
Code: GFZW-GPSQ

Open this URL: https://d-906613033f.awsapps.com/start/#/device?user_code=GFZW-GPSQ
■■■□□□□□ Logging in...
```

`Enter Start URL` and `Enter Region` can be found provided `IDC-sso-starturl` and `IDC-region`

Event Outputs (7)

Search

Key	Value	Stack name	Description	Type
IDC-passwordotp	[redacted]^f)1P2S9HKQYrg&Cn%c5?2imWsy&w*H9deQblv	idc	Identity Center PasswordOTP	export

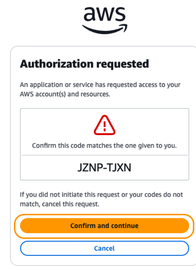
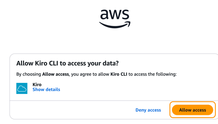
VSCode-ServerURL	https://[redacted].cloudfront.net/?folder=/Workshop	vscode-server	VSCode Server URL	export

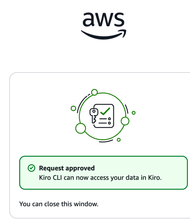
2. Copy the URL: https://d-9999999999.awsapps.com/start/#/device?user_code=XXXX-XXXX and open it in a web browser
3. Confirm Authorize Requested.



4. Allow Kiro for Command Line to access your data.



5. The request has been approved and you can close this window.



6. Navigate back to VSCode, you will see `Logged in successfully`

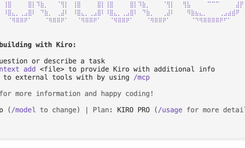
```
Open this URL: https://d-906613033f.awsapps.com/start/#/device?user_code=GFZW-GPSQ
Device authorized

Logged in successfully
participant:/Workshop$
```

7. Start a chat with Kiro

```
kiro-cli chat
```

```
participant:/Workshop$ kiro-cli --version
kiro-cli 1.20.0
participant:/Workshop$ kiro-cli chat
```



```
Jump into building with Kiro:

1. Ask a question or describe a task
2. Use /context add <file> to provide Kiro with additional info
3. Connect to external tools with by using /mcp

Use /help for more information and happy coding!

Model: Auto (/model to change) | Plan: KIRO PRO (/usage for more detail)

>
```

8. Select a model for the current conversation session

```
/model
```

You can use the default version

```
> /model

Press (↑↓) to navigate · Enter(↵) to select model
› Auto (current) | 1x credit | Models chosen by task for optimal usage and consistent quality
  claude-sonnet-4.5 | 1.3x credit | The latest Claude Sonnet model
  claude-sonnet-4 | 1.3x credit | Hybrid reasoning and coding for regular use
  claude-haiku-4.5 | 0.4x credit | The latest Claude Haiku model
```

Congratulations!! You're now ready to chat with Kiro CLI.

Note: For other operating systems, please see the installation guide here
