

Note
Only follow the instructions in this section if you not able to login to login to your IAM Identity Center in In [Option 1](#) 1. Pro: Amazon Kiro Pro Subscription management with AWS IAM Identity Center integration

Kiro is a generative artificial intelligence (AI) powered conversational assistant that can help you understand, build, extend, and operate AWS applications. In the workshop [AWS IAM Identity Center configuration updates](#), we already created an Identity Center instance with a user - qdev@example.com

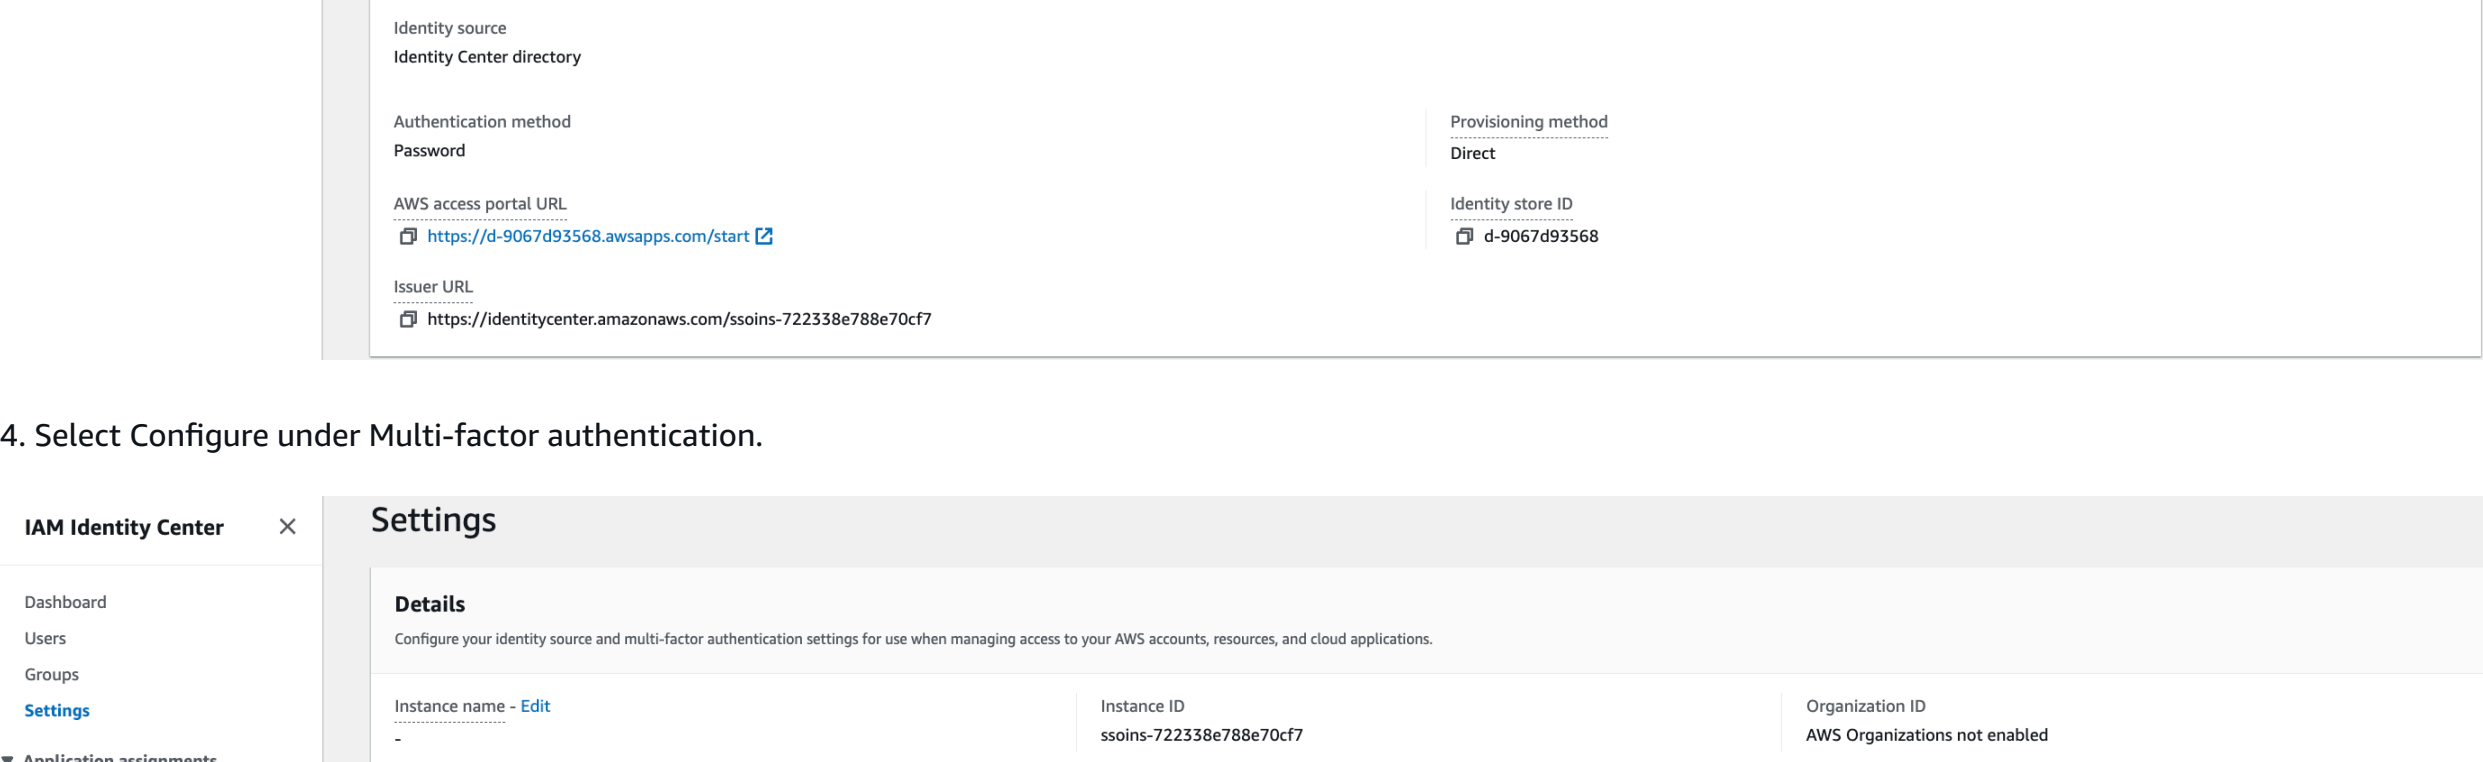

1. Navigate to [AWS console](#), search for 'IAM Identity Center' and open the Identity Center console.

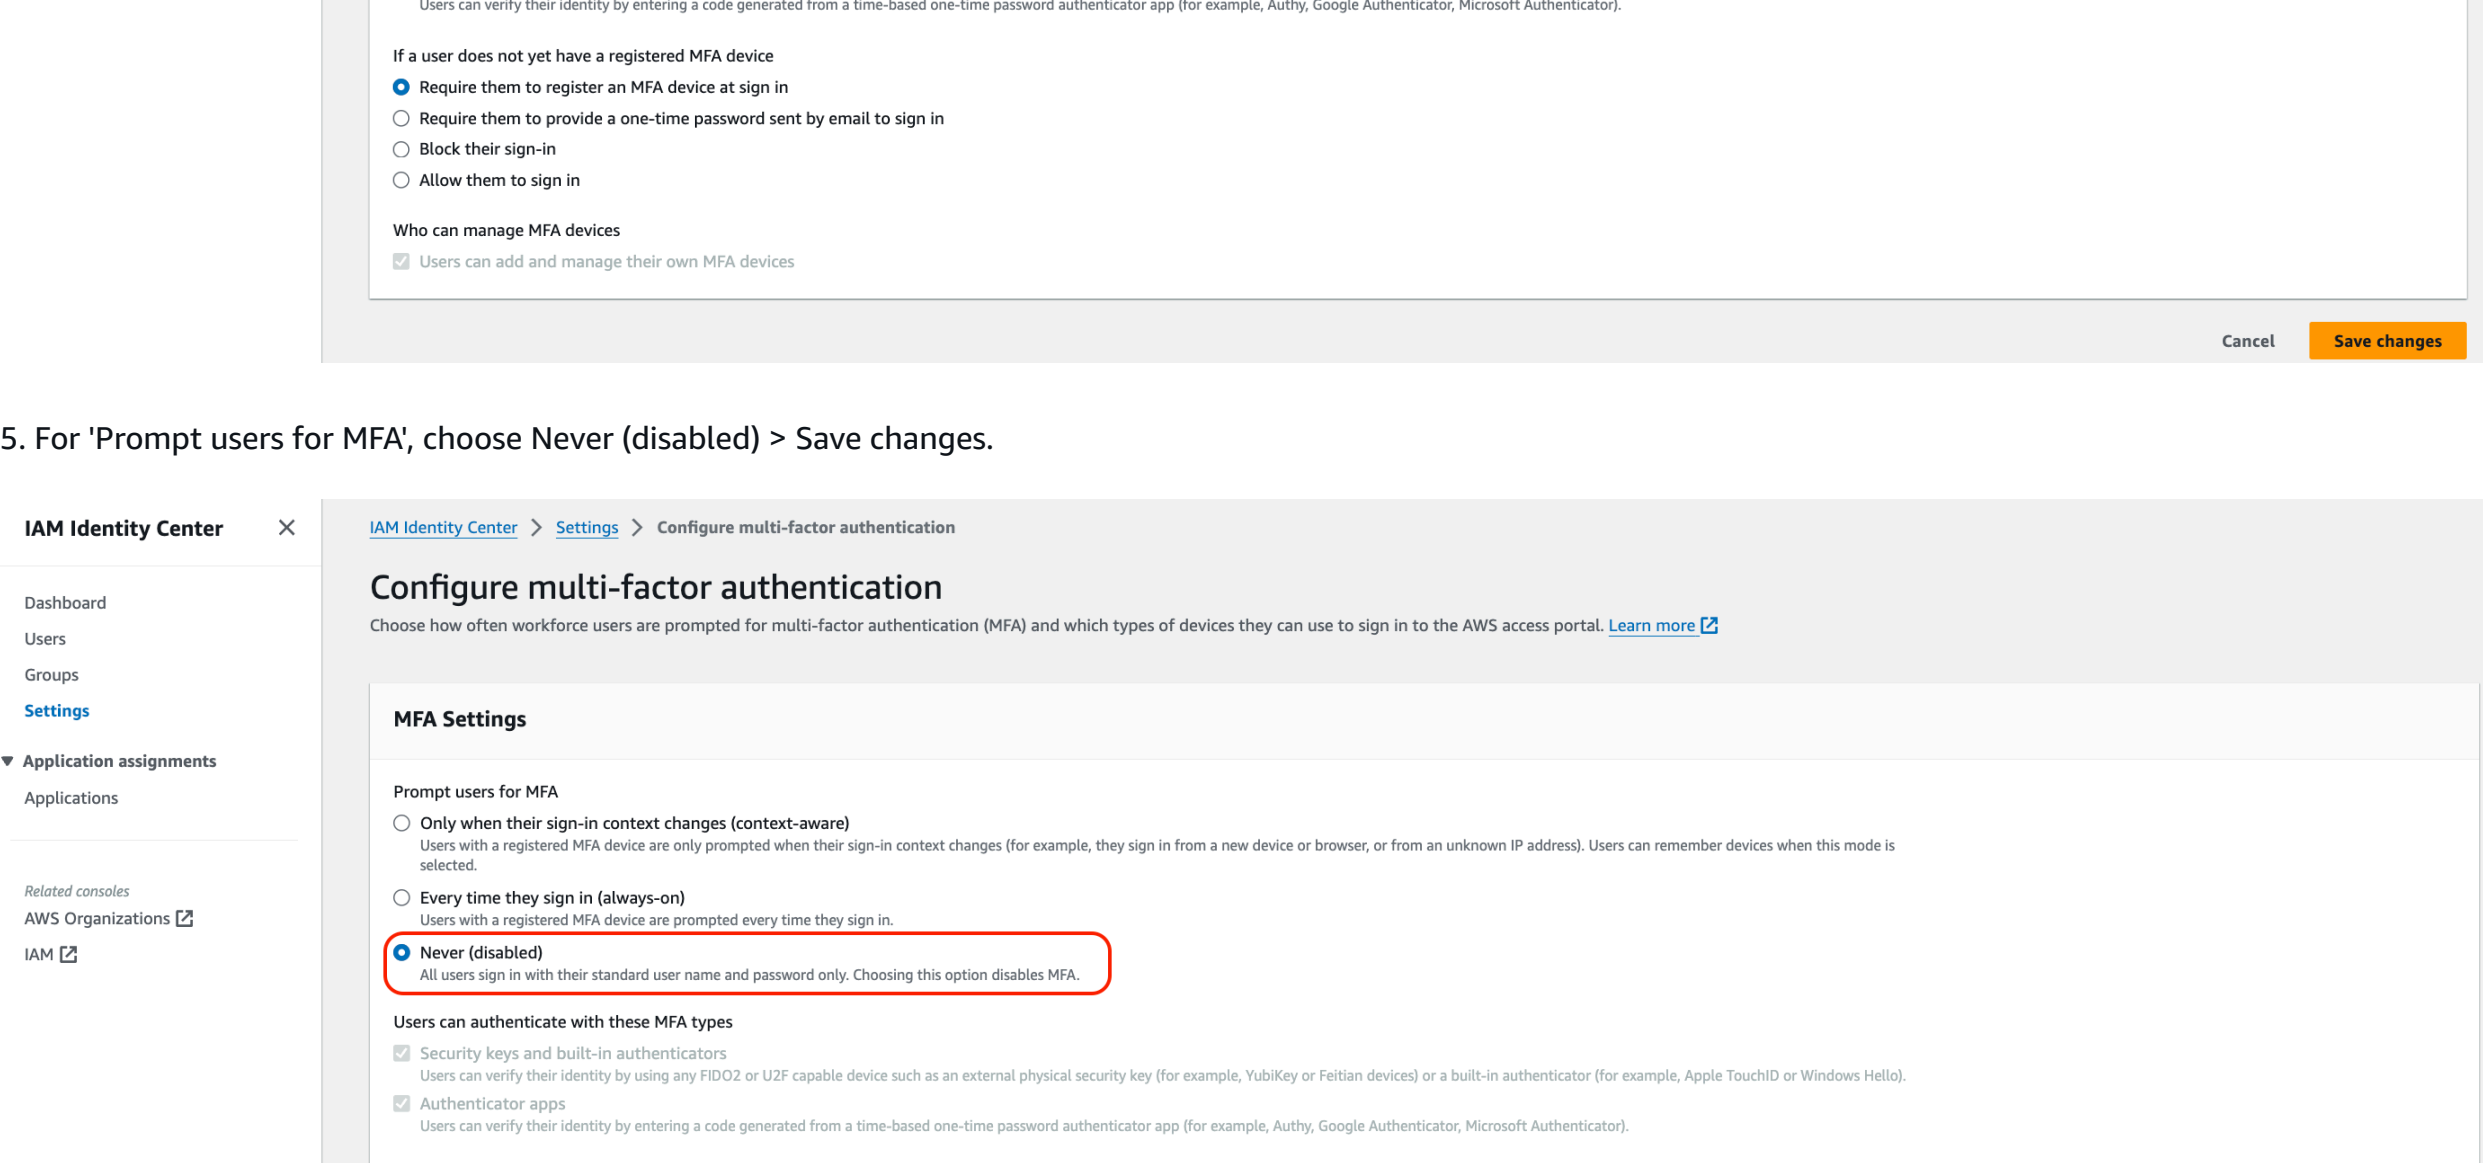

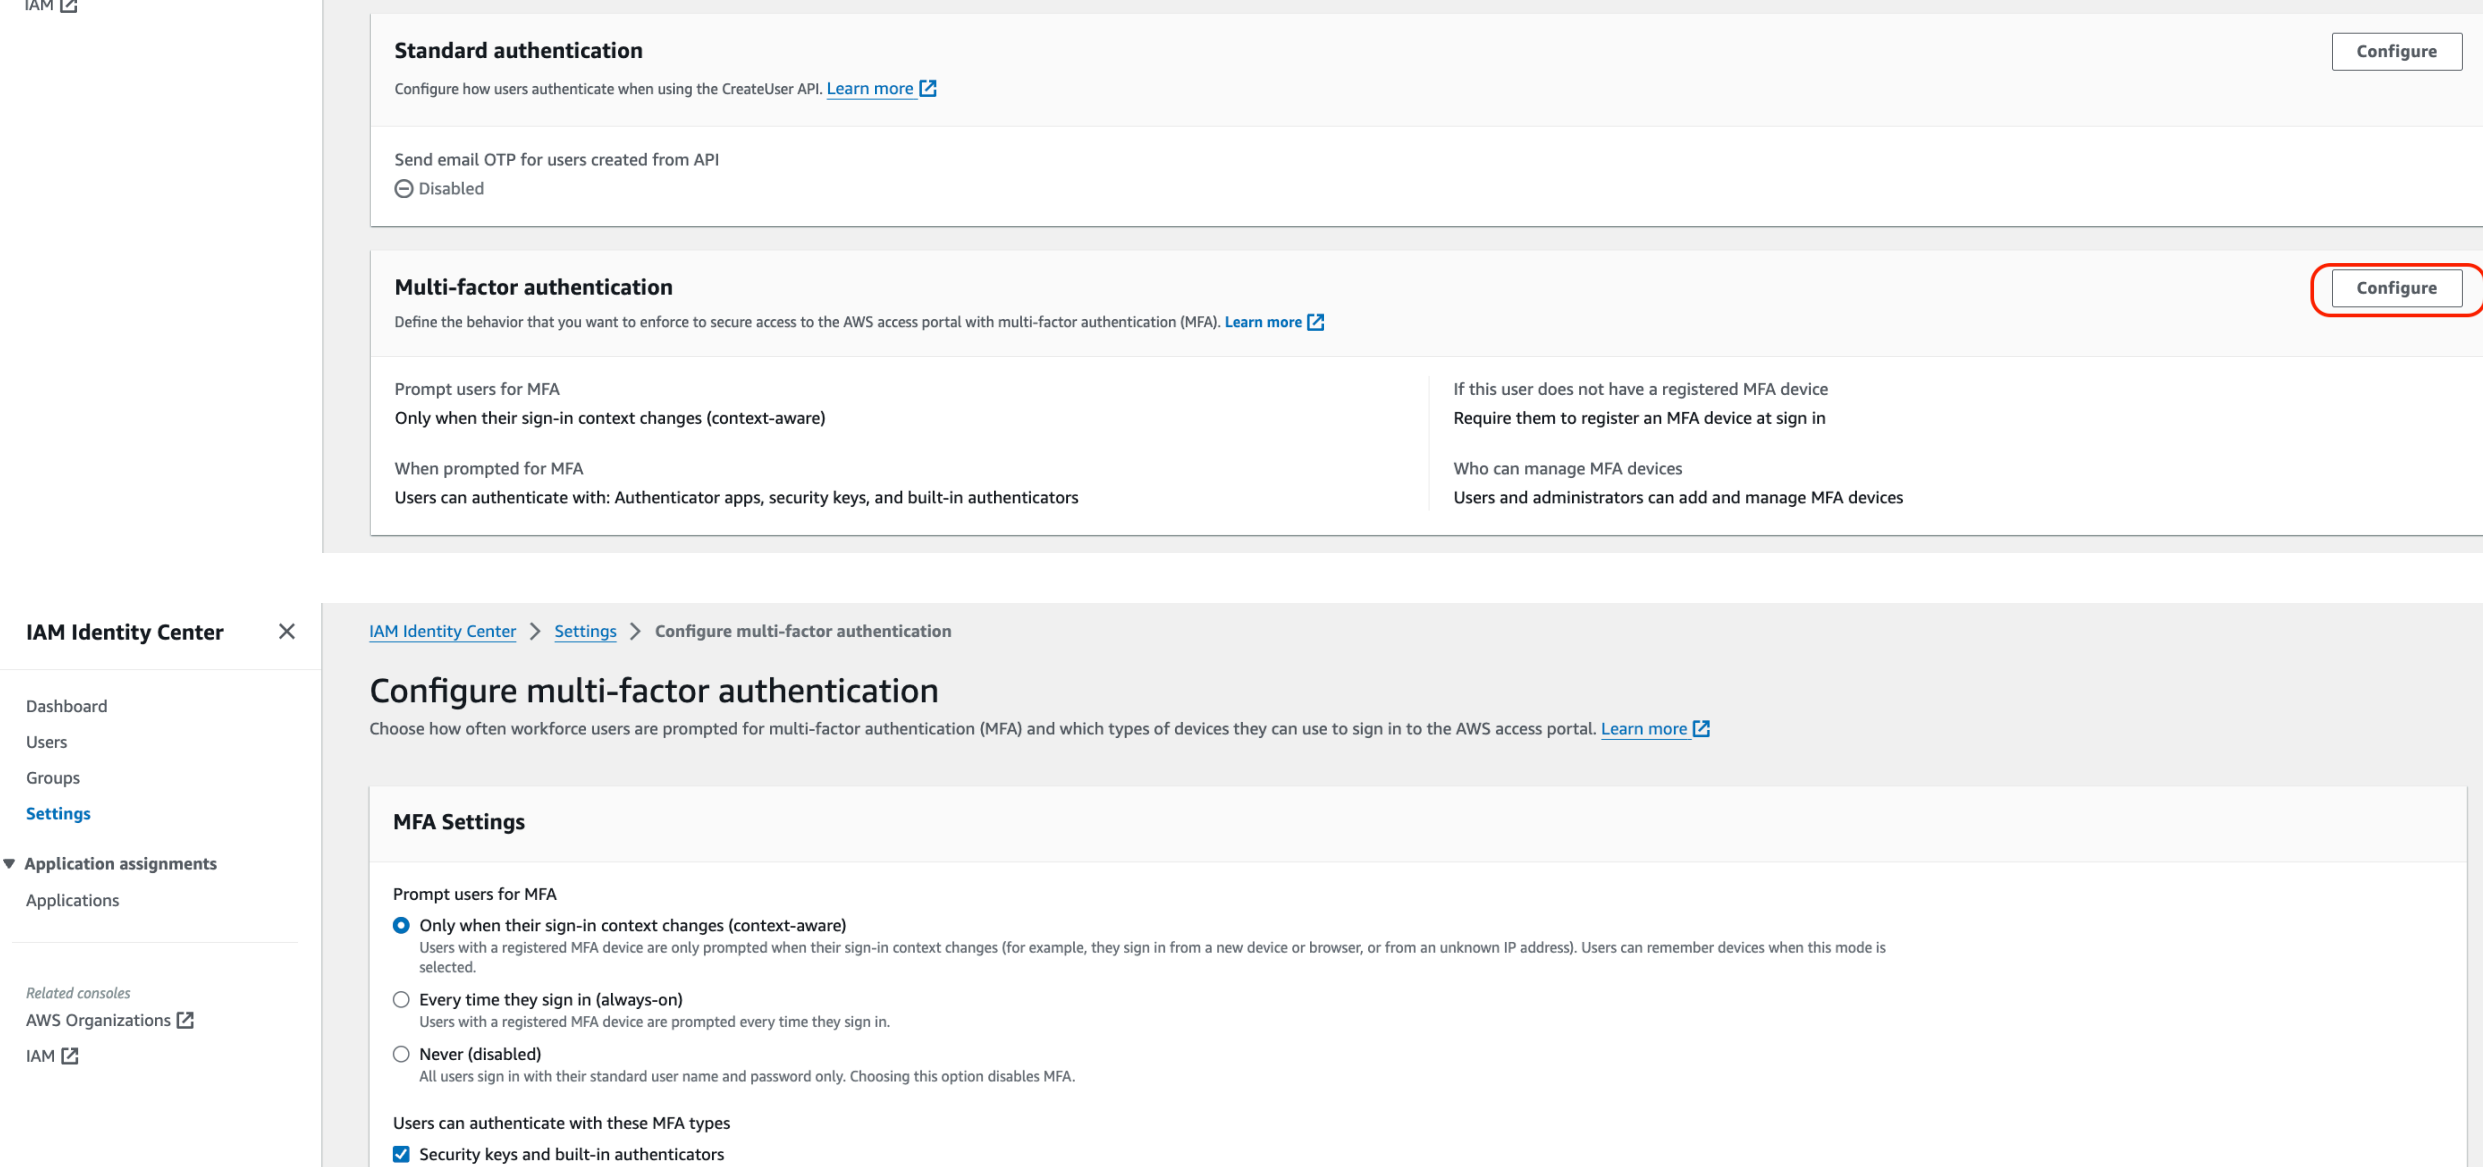

2. Navigate to the Settings tab.

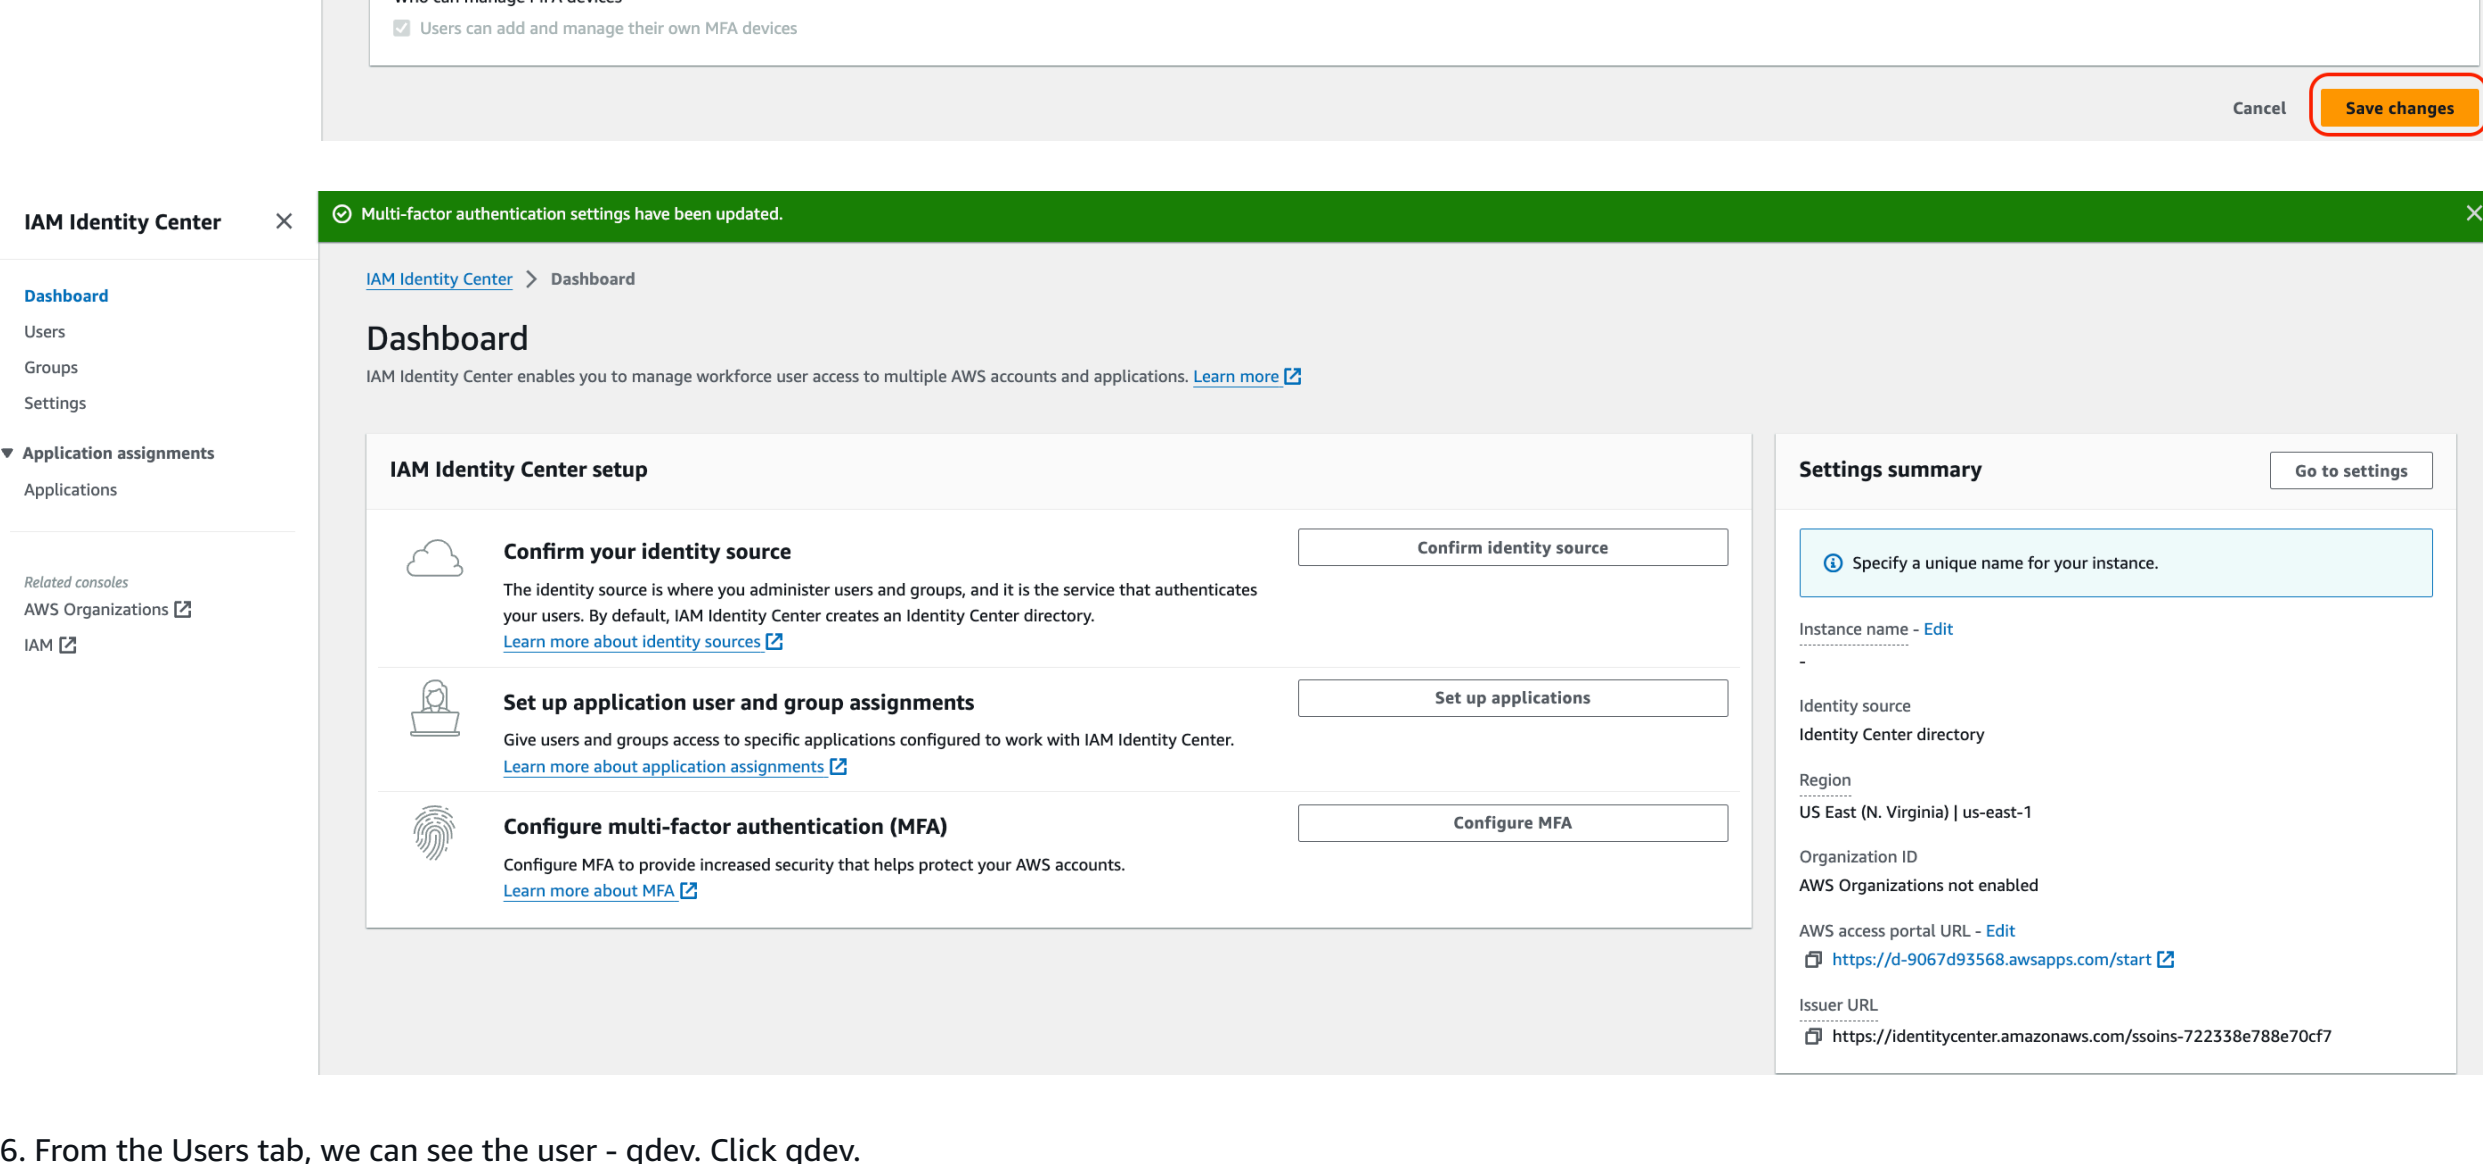

3. Choose the Authentication tab.

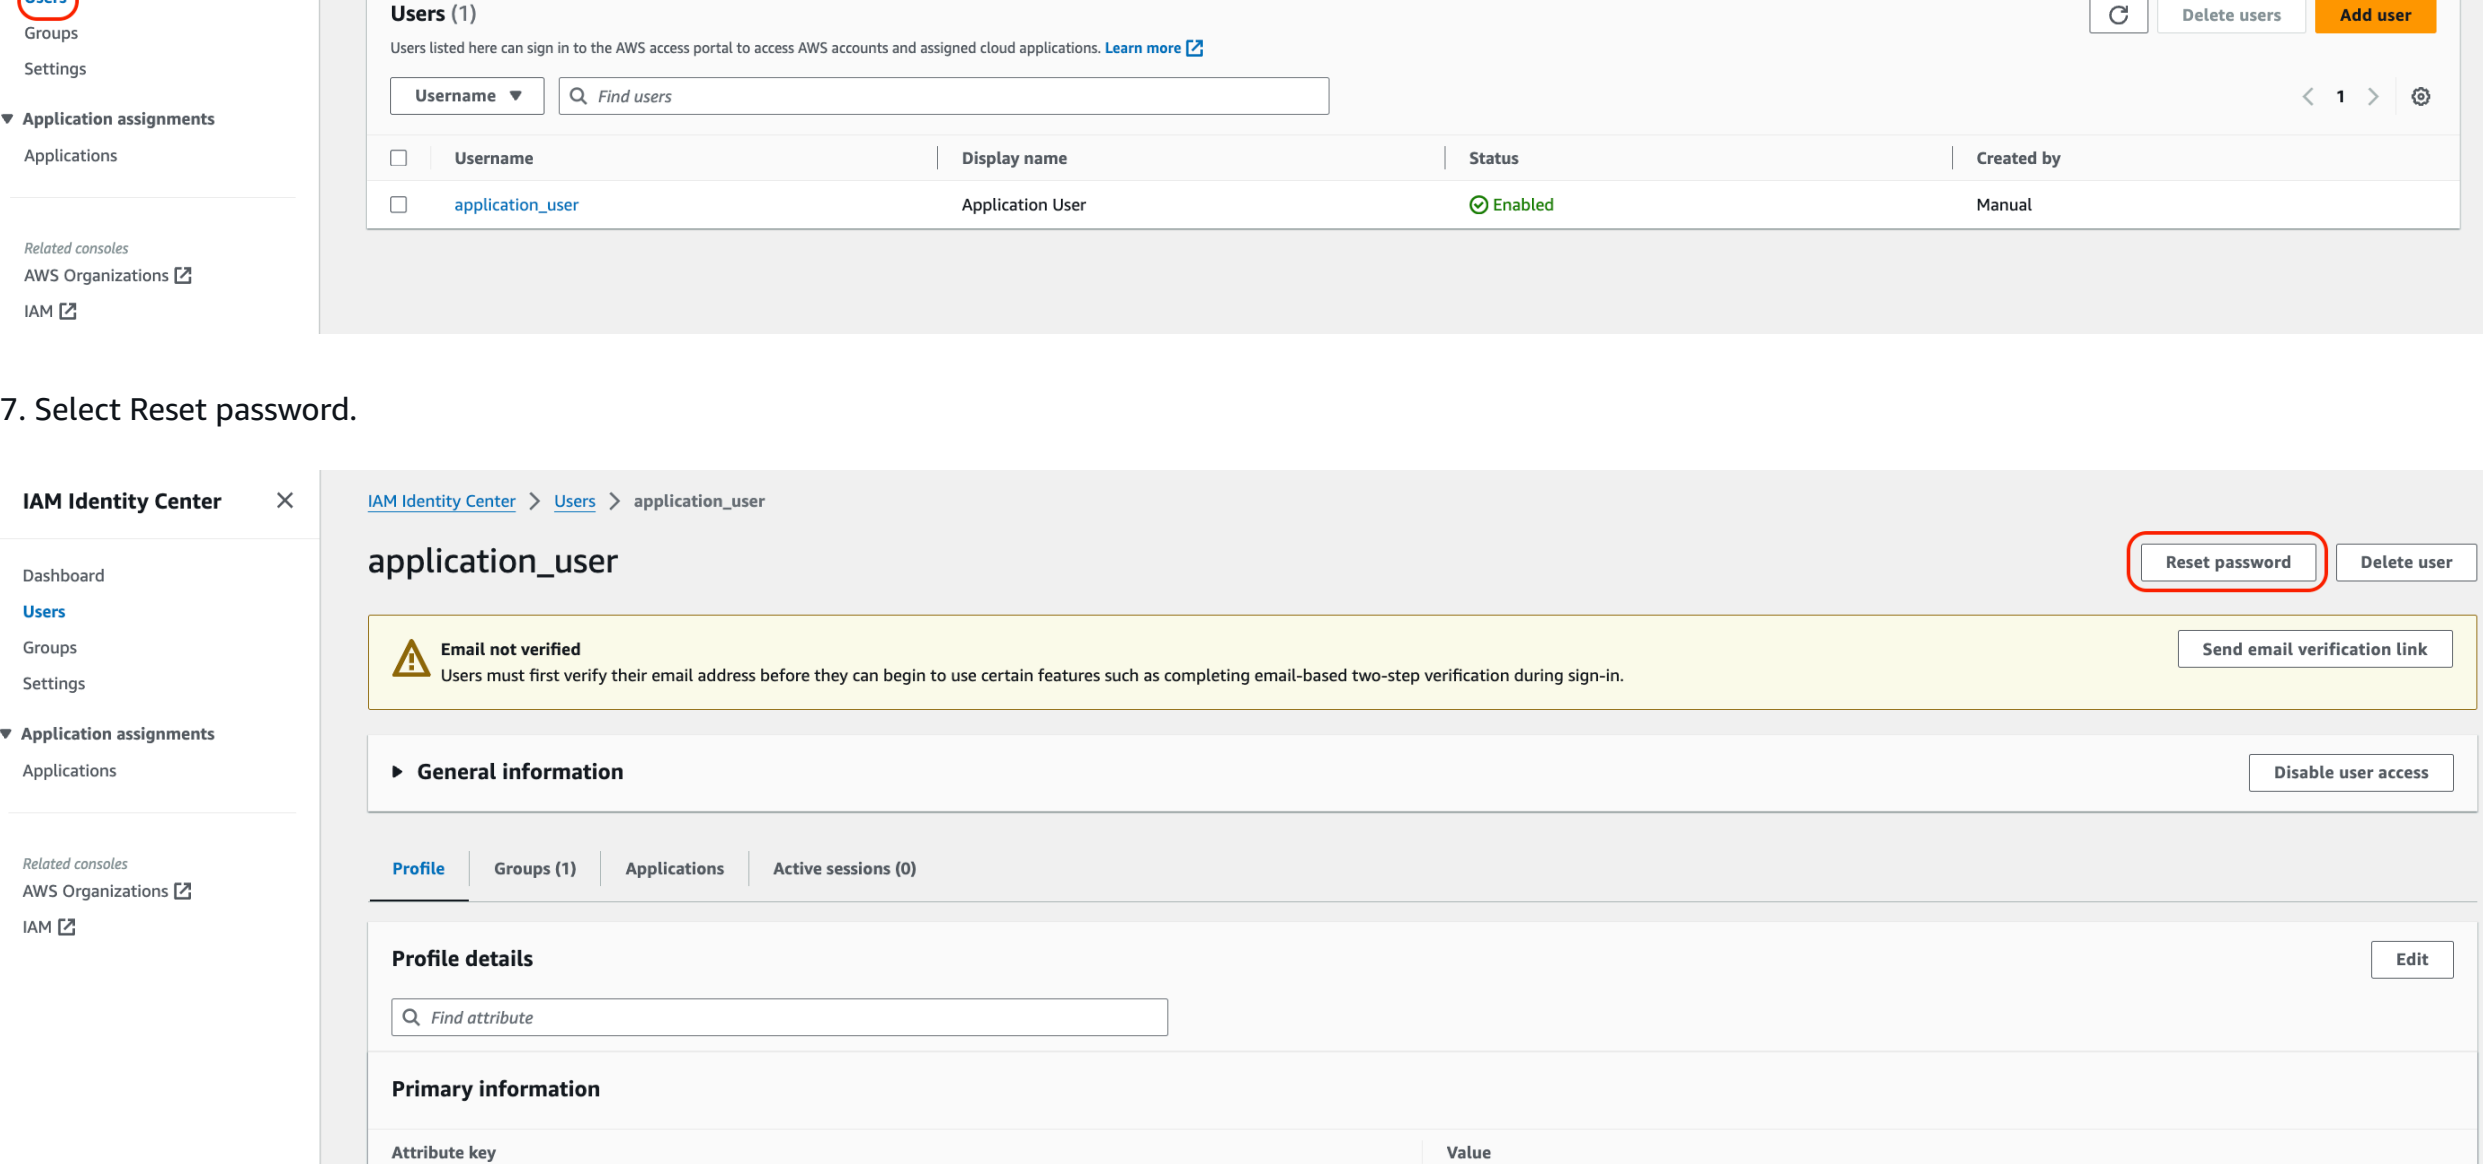

4. Select Configure under Multi-factor authentication.

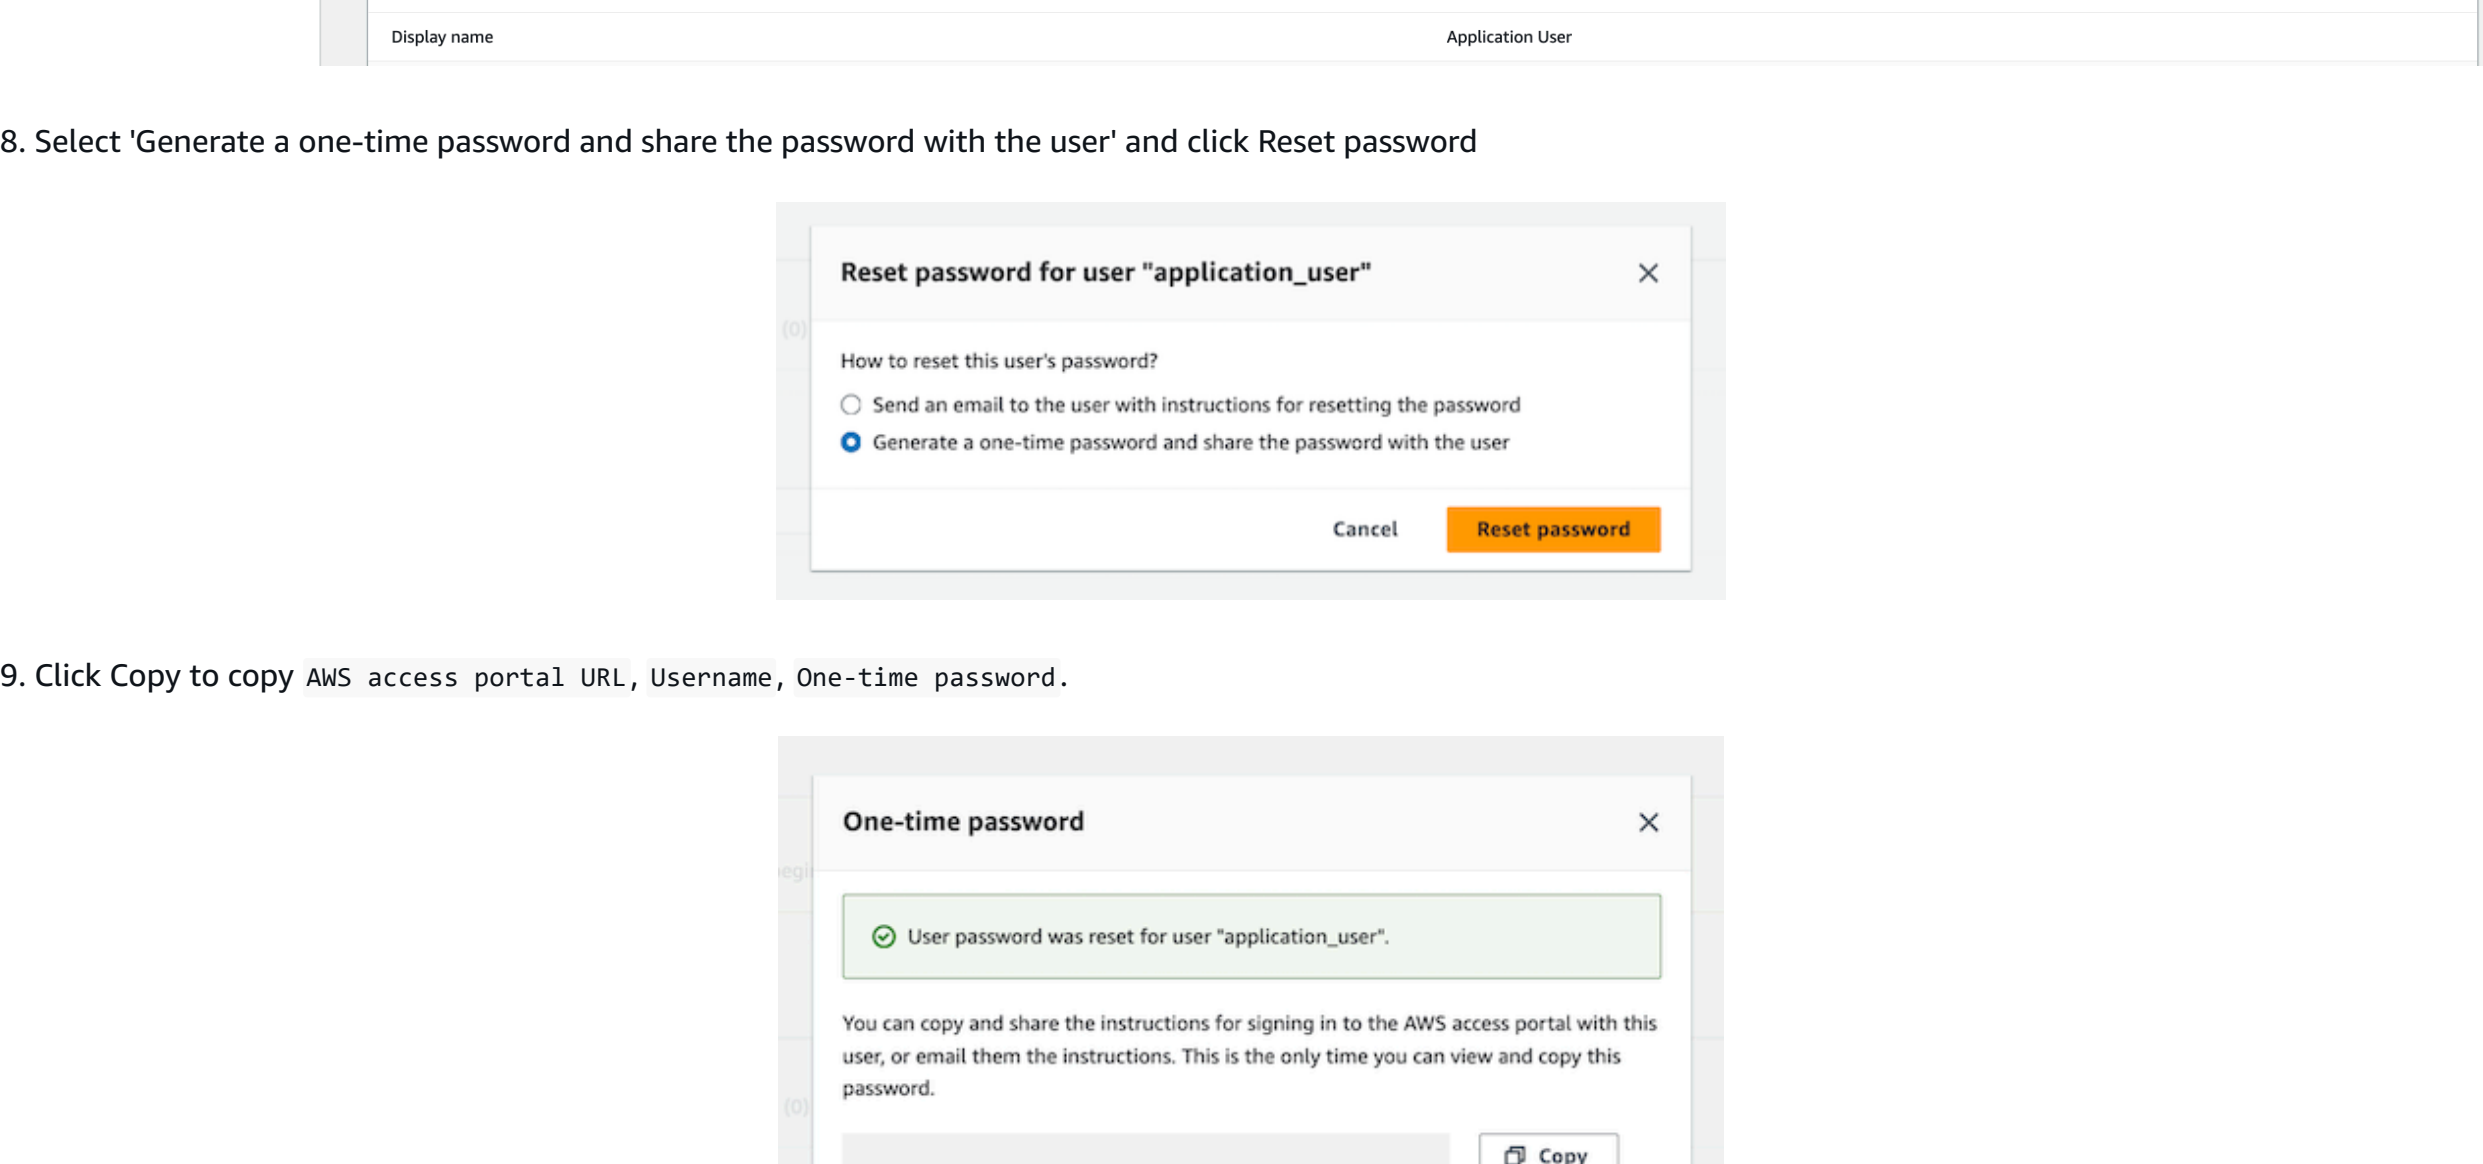

5. For 'Prompt users for MFA', choose Never (disabled) > Save changes.

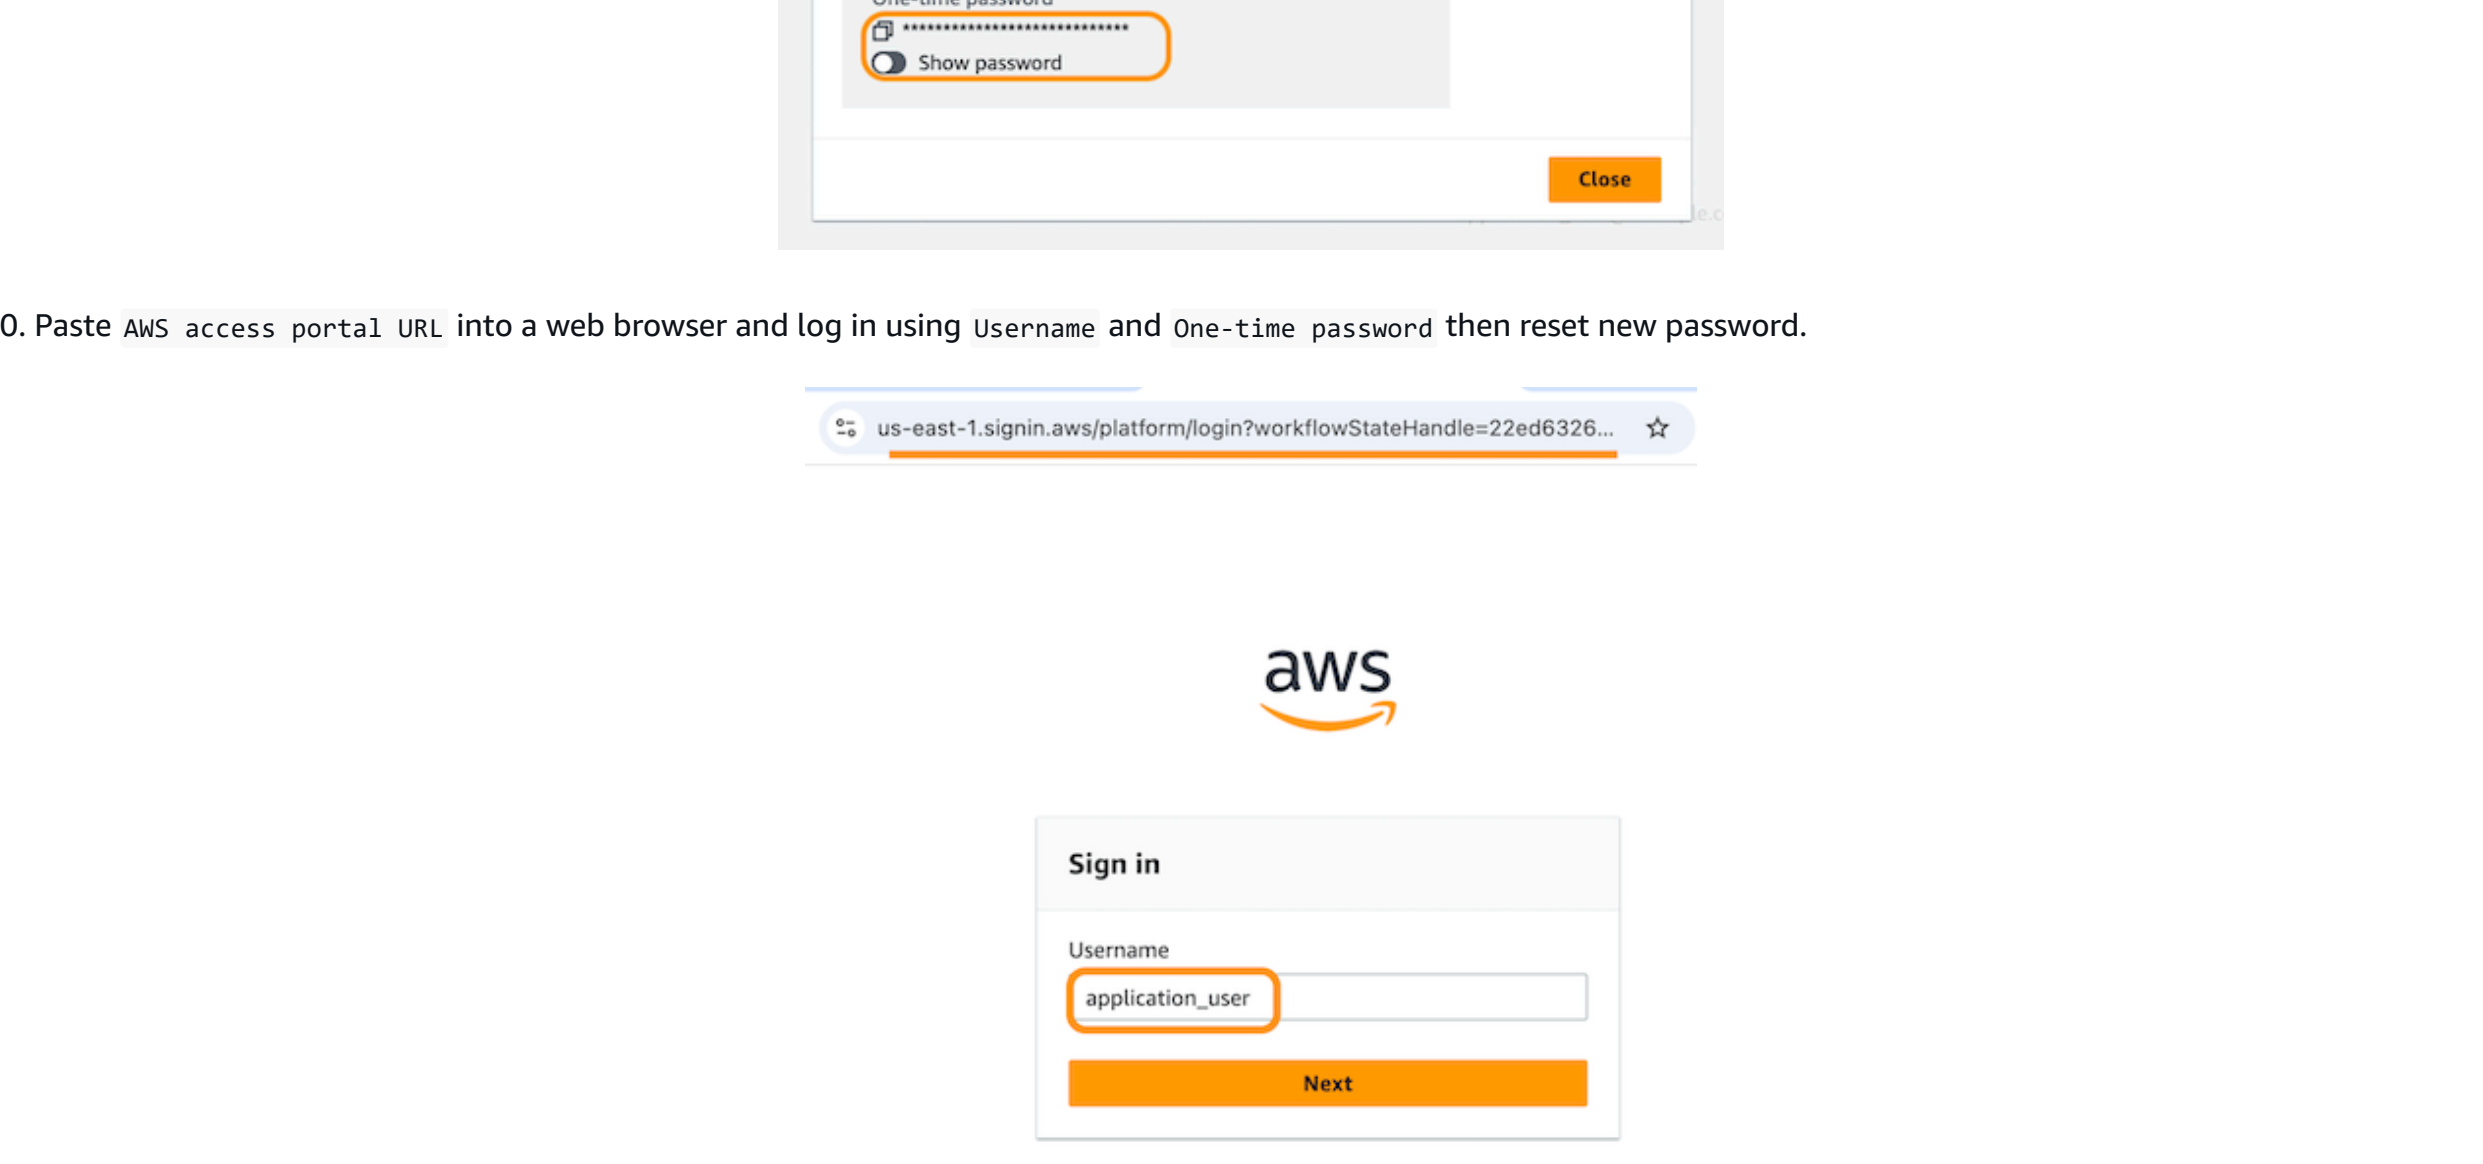

6. From the Users tab, we can see the user - qdev. Click qdev.

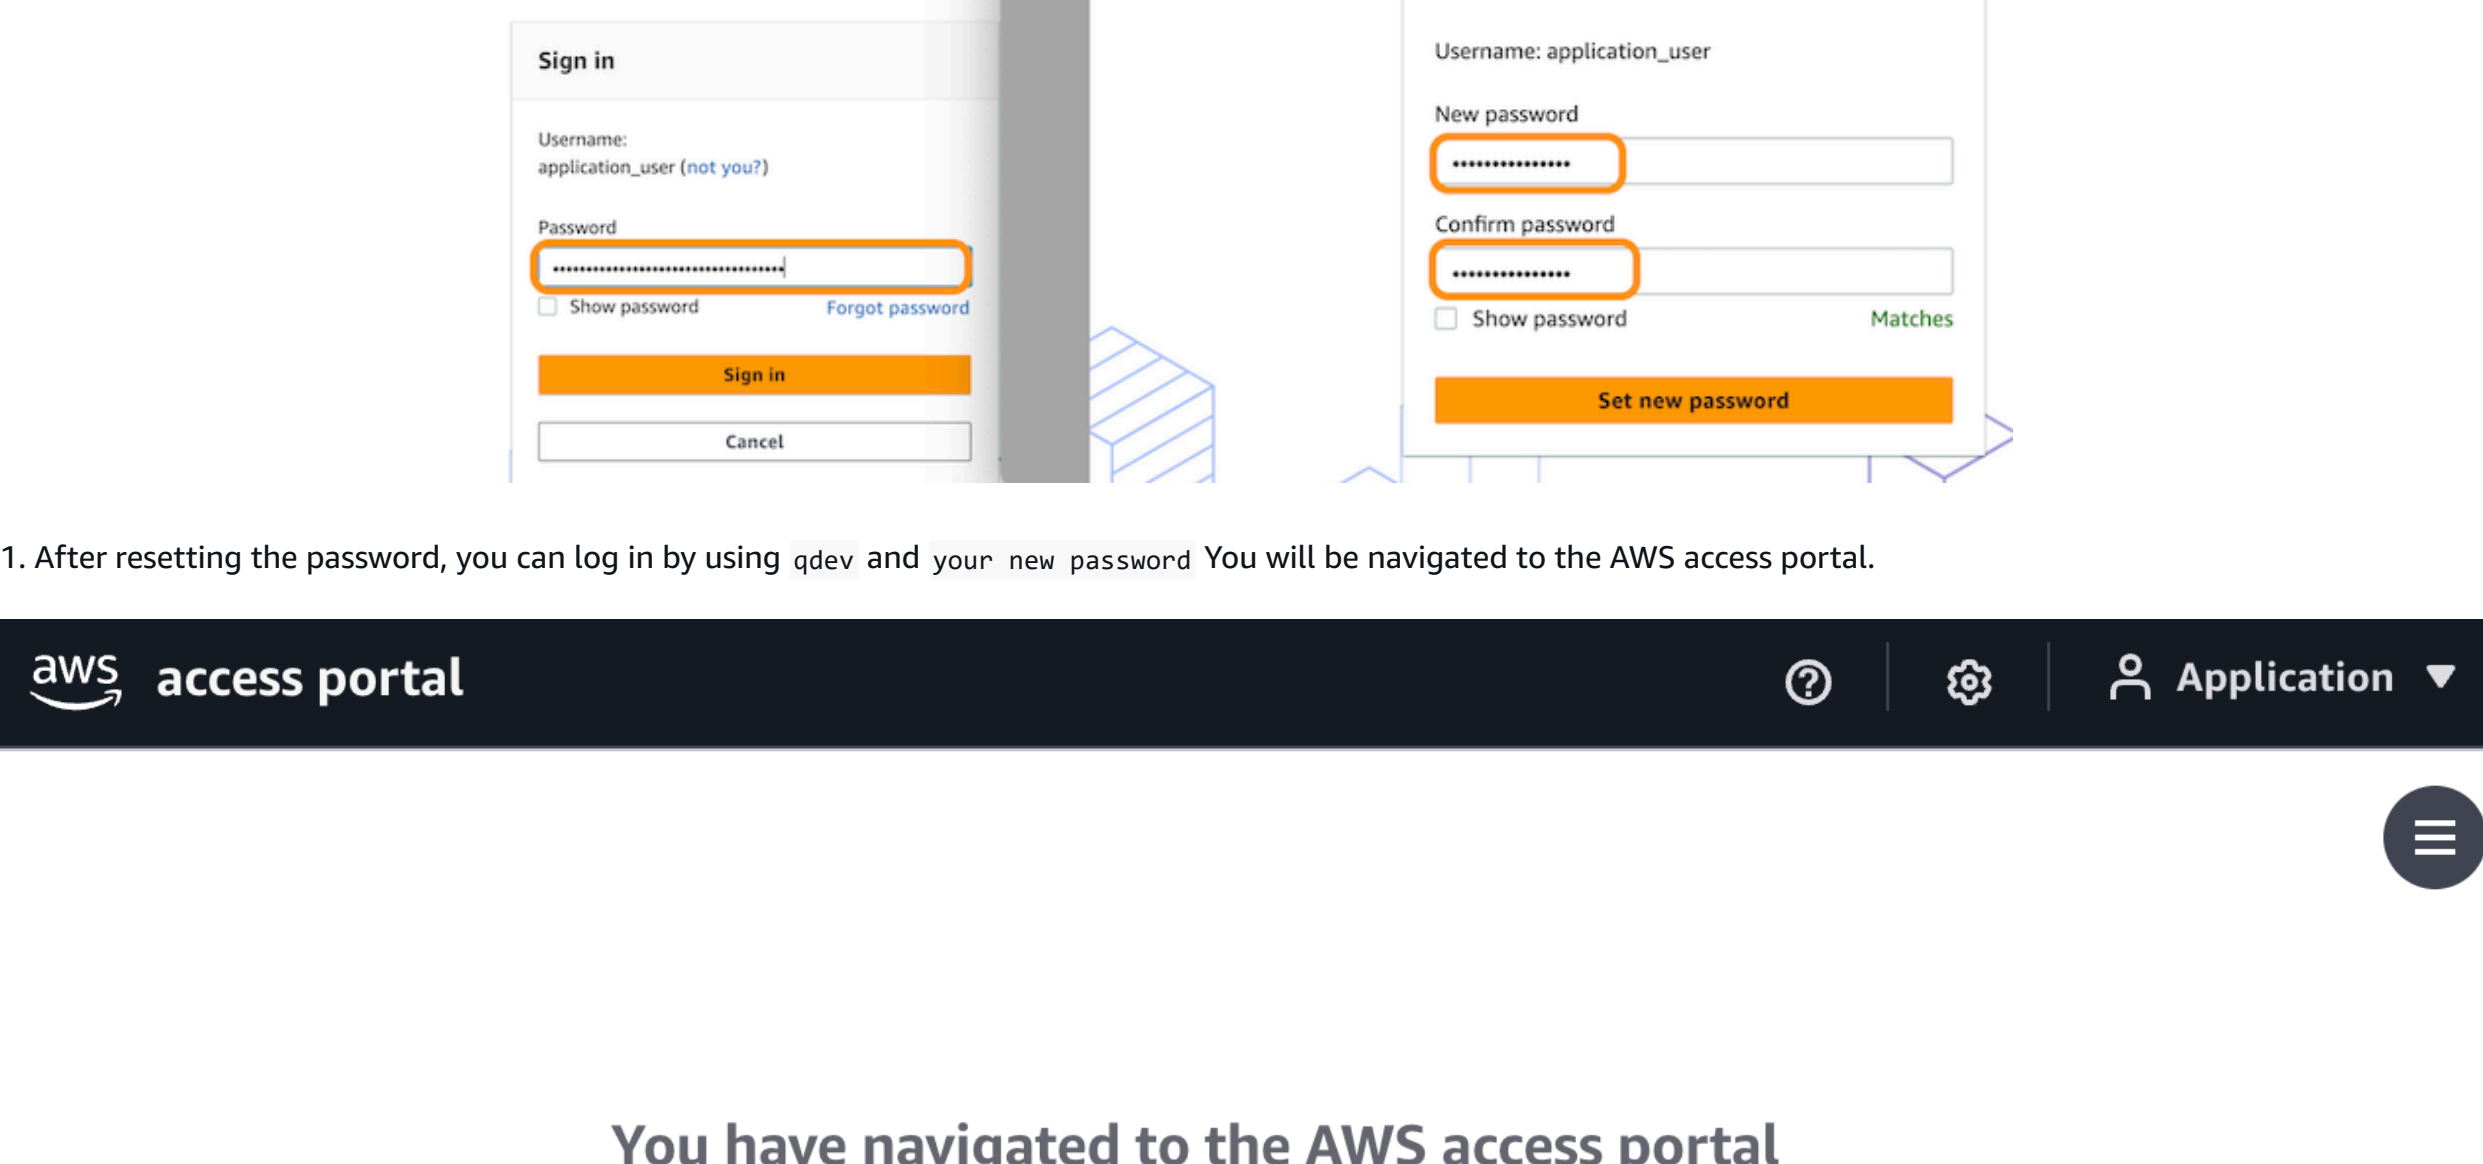

7. Select Reset password.

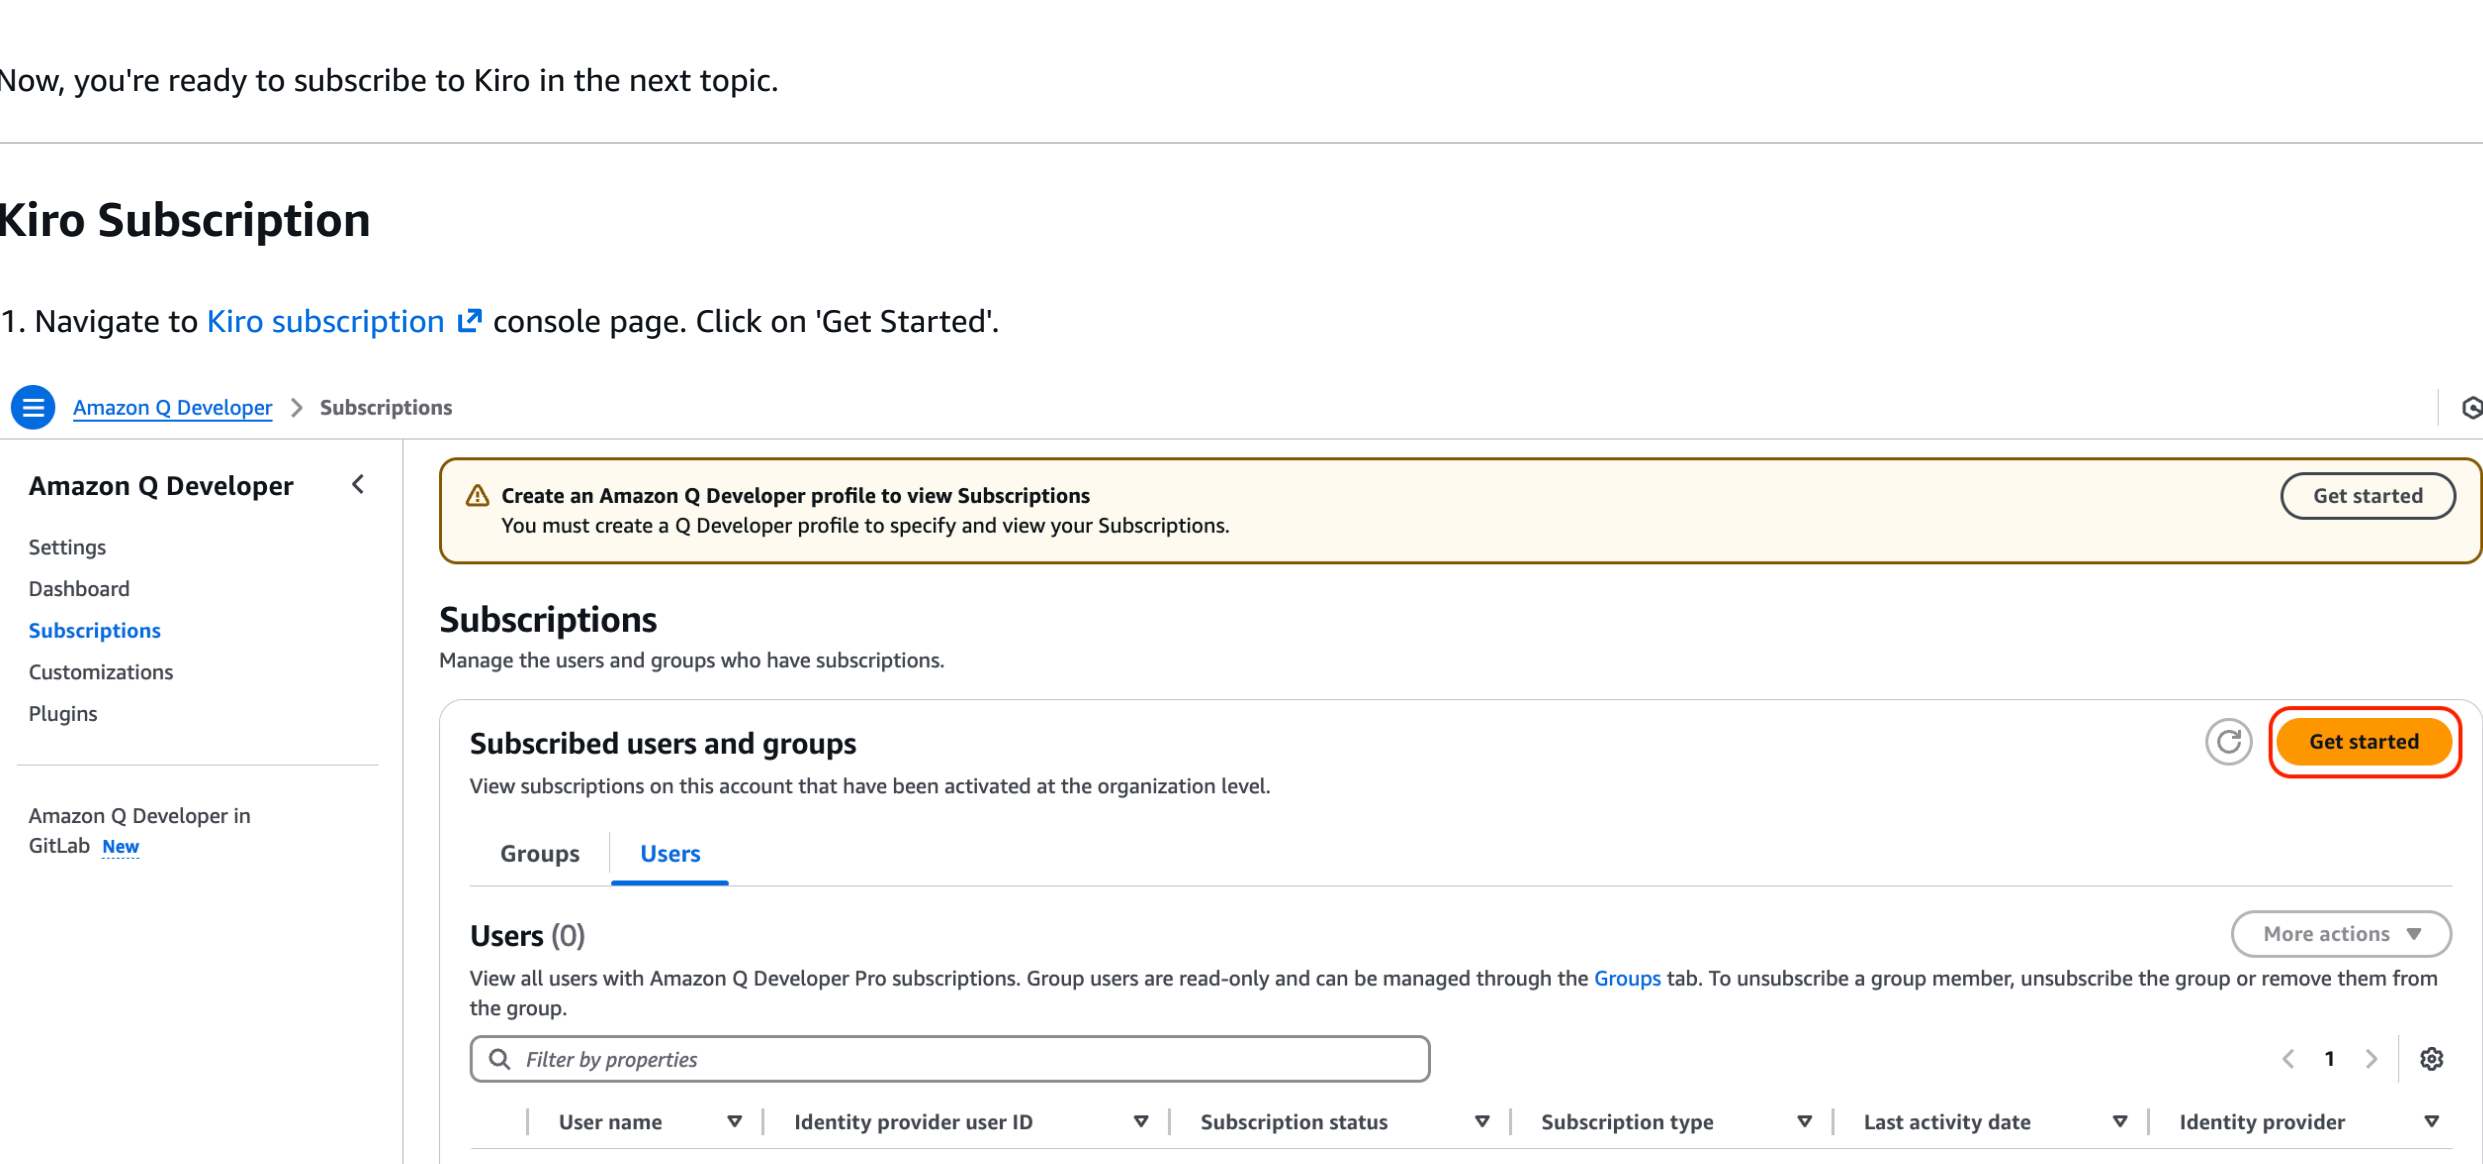

8. Select 'Generate a one-time password and share the password with the user' and click Reset password

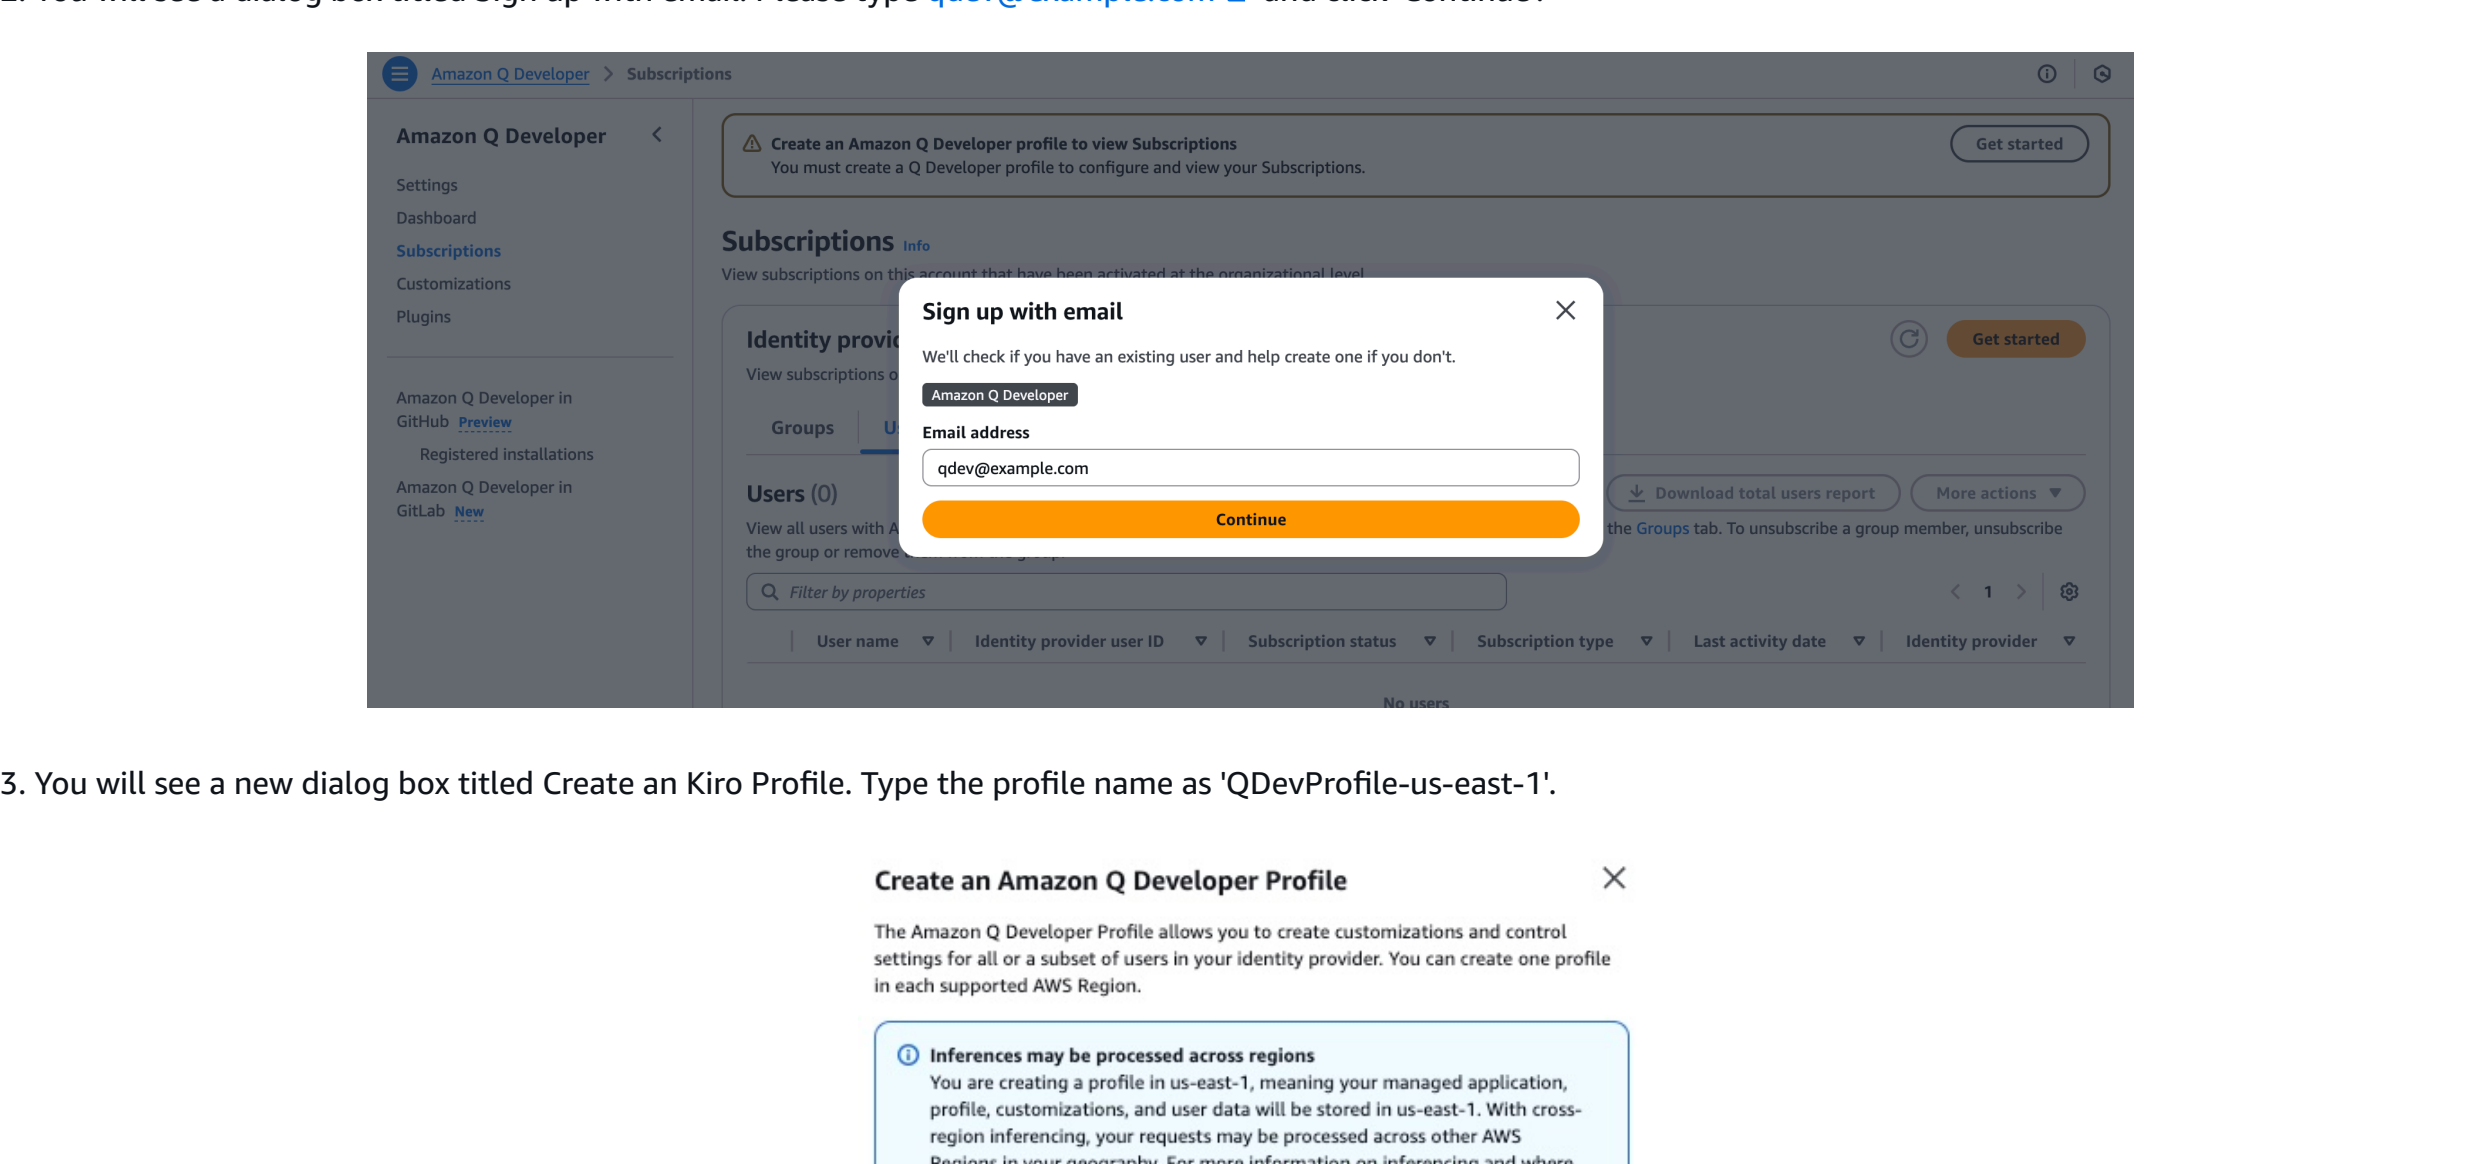

9. Click Copy to copy AWS access portal URL, Username, One-time password.

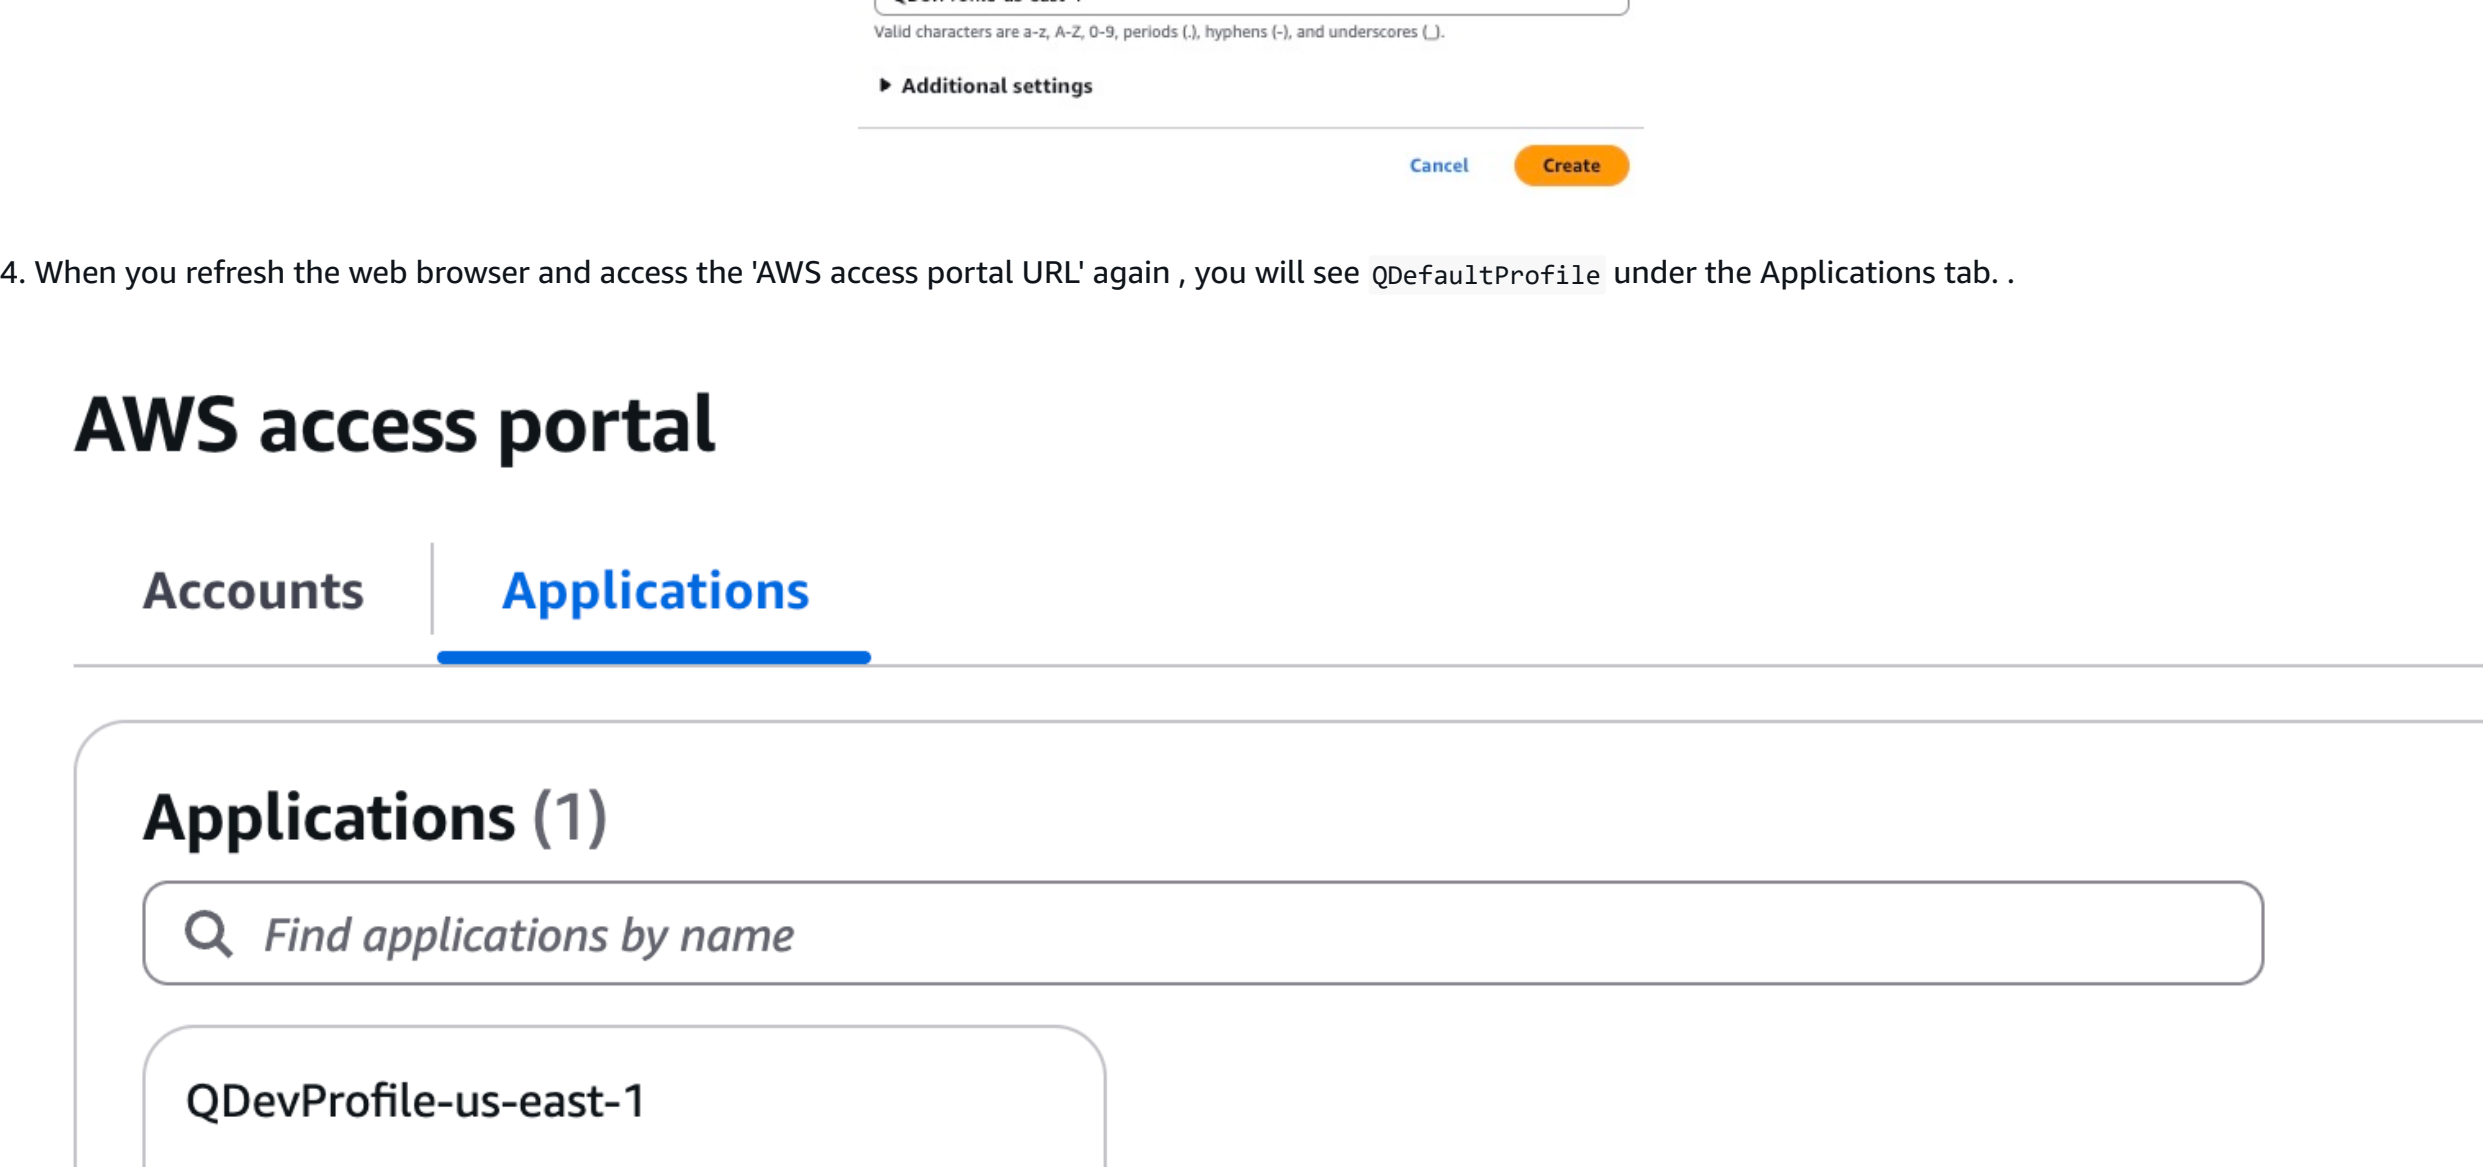

10. Paste AWS access portal URL into a web browser and log in using Username and one-time password then reset new password.

11. After resetting the password, you can log in by using qdev and your new password. You will be navigated to the AWS access portal.

12. You will see a dialog box titled Sign up with email. Please type qdev@example.com and click 'Continue'.

13. You will see a new dialog box titled Create a Kiro Profile. Type the profile name as 'QDevProfile-us-east-1'.
