

Infrastructure as Code (IaC) project for converting visual diagrams into Terraform configurations using Kiro.

Overview

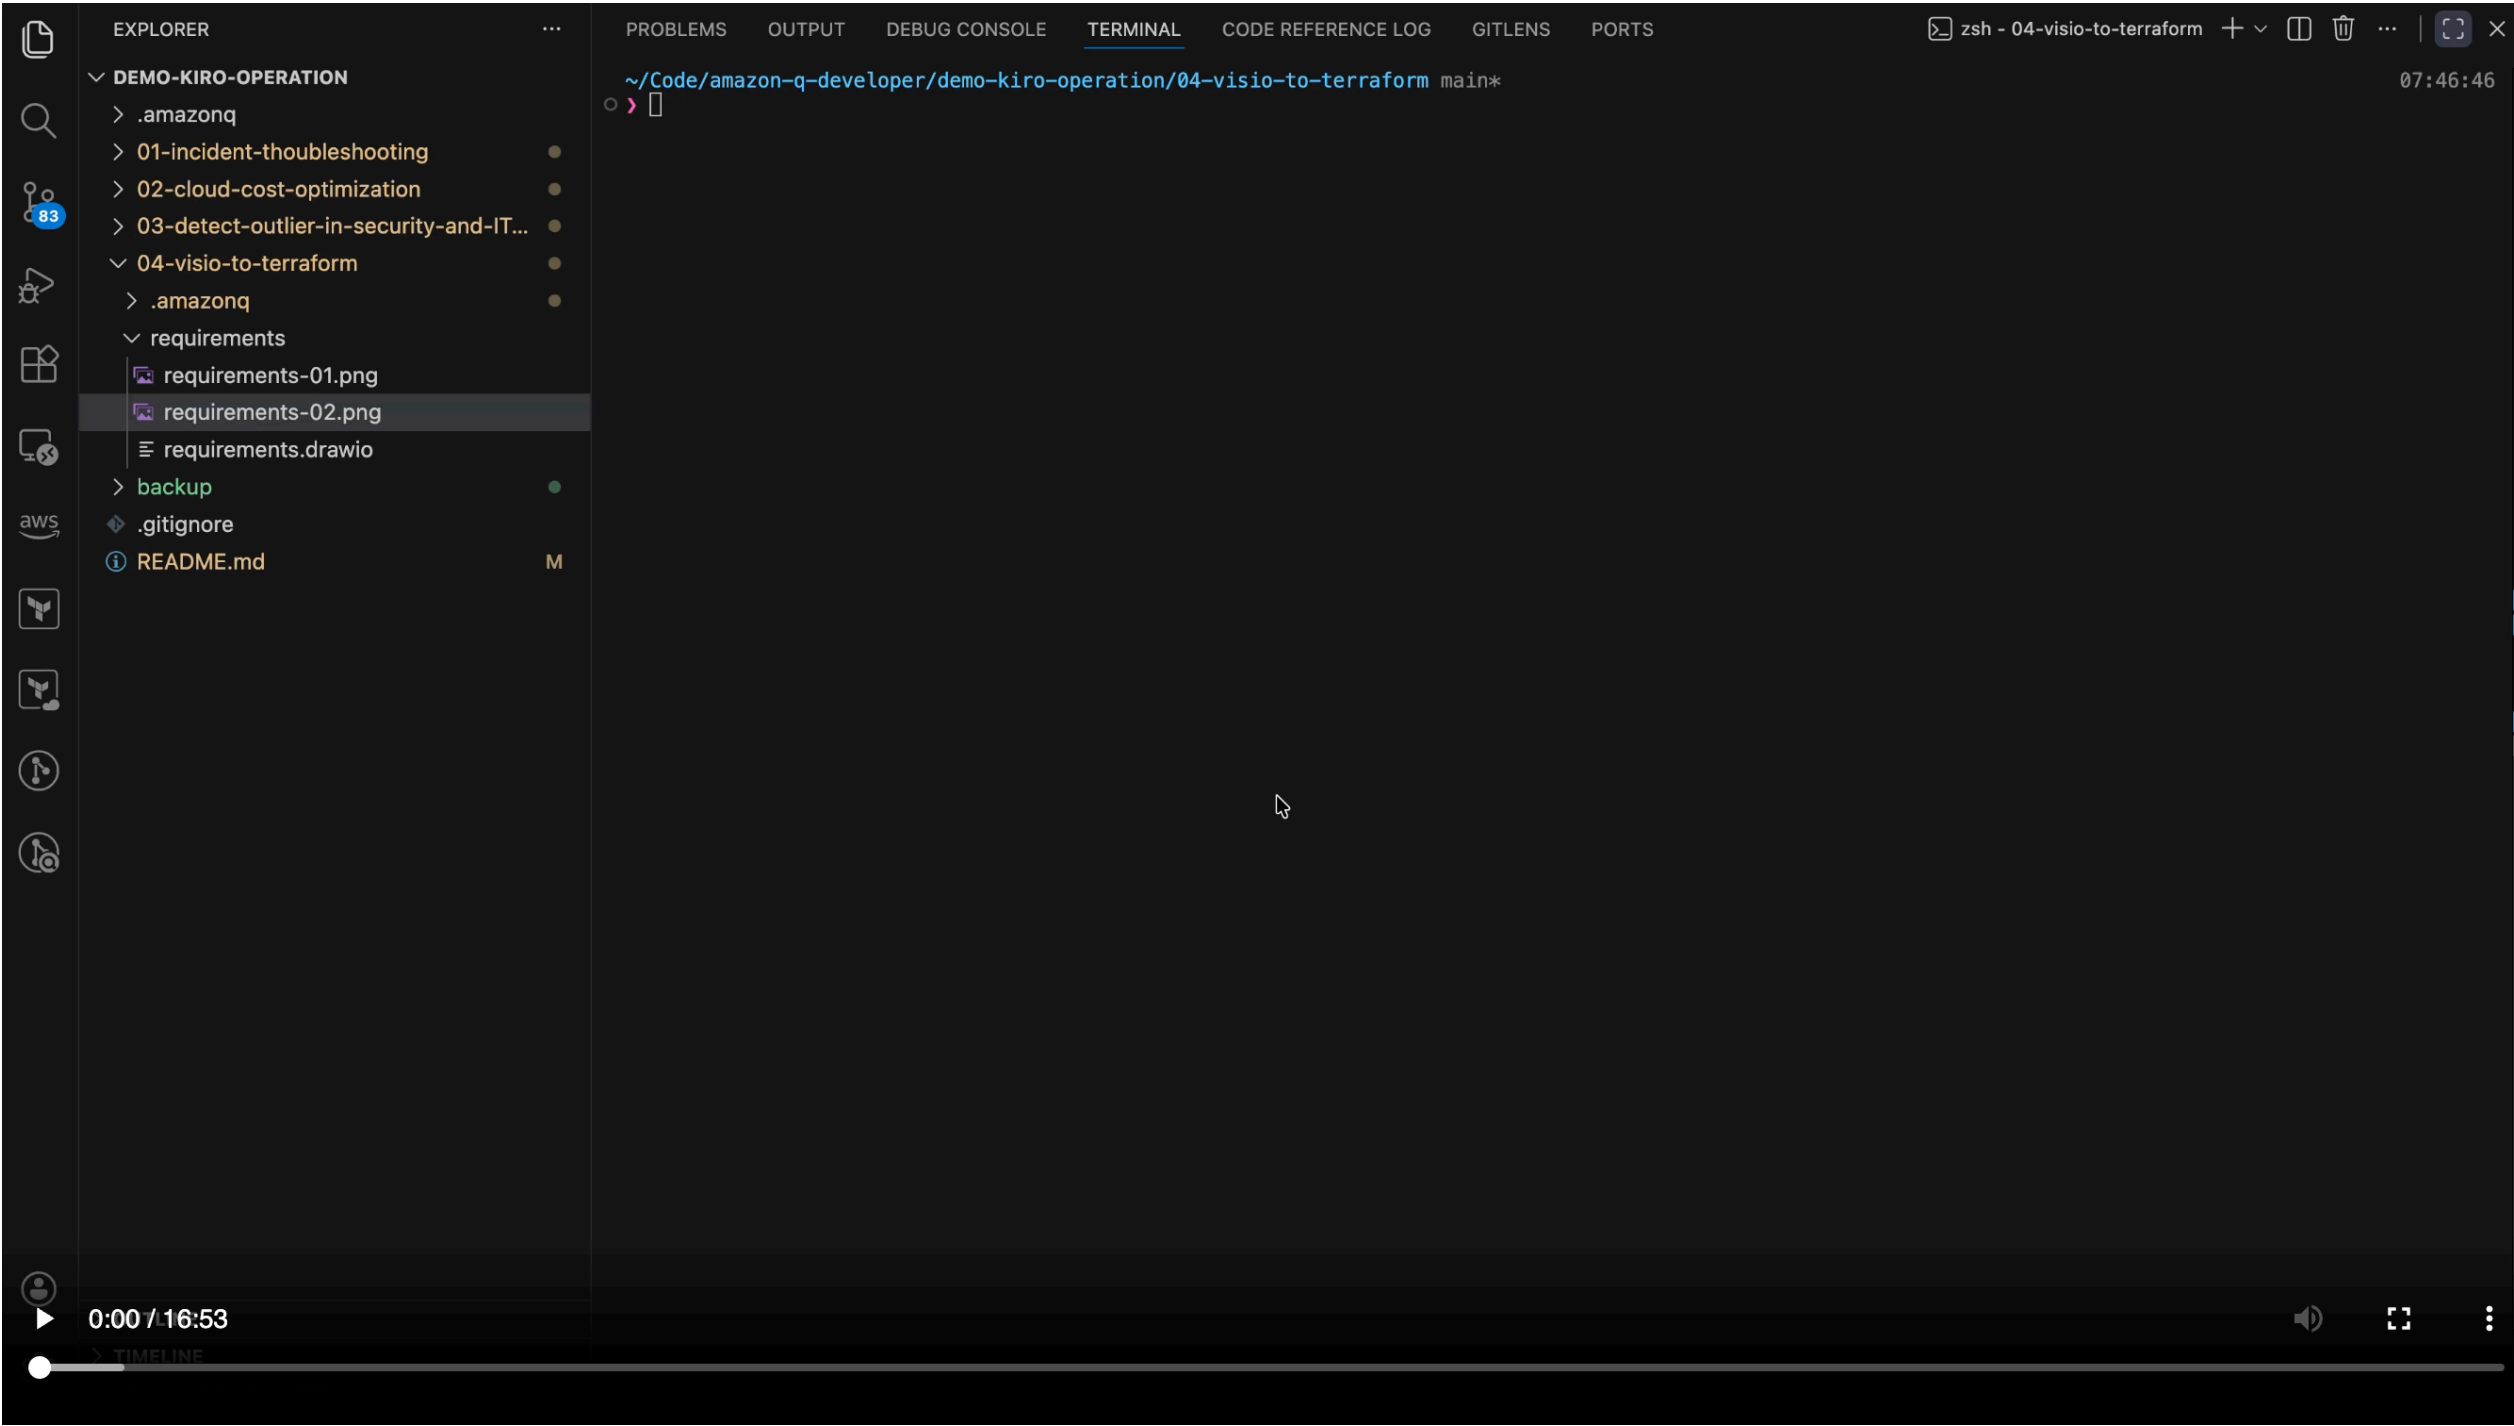

This demonstration shows how Kiro can help with:

- Visual infrastructure diagram interpretation
- Terraform code generation following AWS best practices
- Security compliance validation with Checkov
- Comprehensive documentation and Architecture Decision Records (ADRs)

Demo Videos

1. Visio to Terraform Conversion

Watch how Kiro converts visual infrastructure diagrams into production-ready Terraform code.

What You'll Learn

- Visual diagram interpretation techniques with AI
- Automated Terraform code generation
- Infrastructure as Code best practices
- Security compliance validation approaches
- Documentation generation for infrastructure projects
