

This comprehensive collection of resources provides everything you need to get started with Kiro and maximize its potential across your development lifecycle. From presentations and workshops to role-specific guides covering build, deploy, operations, security, and more, these materials will help you leverage AI-powered development assistance effectively.

- Presentation:
 - [Kiro](#)
 - [Generative AI for Developer Masterclass](#)
- Public Workshop: [Kiro \(Kiro\) - Getting Started from Build to Operate](#) We will keep updating the content.
- [Kiro CLI source code explanation](#)
- Github: [AWS MCP Server](#) (Recommend to use)
- Example Prompt: [Prompting for Kiro promptz.dev](#)
- All Roles
 - [TH] [แนะนำการใช้งาน Kiro CLI ผู้ช่วย Agentic AI ที่จะช่วยเพิ่มประสิทธิภาพในการพัฒนาซอฟต์แวร์ของคุณ](#)
 - [TH] [แนะนำการใช้งาน Model Context Protocol \(MCP\) ที่จะช่วยเพิ่มขีดความสามารถให้ Kiro CLI ทำงานกับเครื่องมือต่าง ๆ ได้](#)
 - [TH] [วิธีเปิดใช้งาน Kiro Pro Tier บน SageMaker Jupyter Notebook ด้วย user จาก IAM Identity Center](#)
 - [TH] [ตัวอย่างการใช้งาน Model Context Protocol\(MCP\) หลายๆ server เพื่อเพิ่มความสามารถของ Kiro CLI](#)
 - [TH] [Onboarding Paths สำหรับ Kiro Pro](#)
 - [EN] [Kiro in GitHub \(in preview\) accelerates code generation](#)
 - [EN] [MCP explanation](#)
 - [EN] [Exploring the latest features of the Kiro CLI](#)
 - [EN] [Use Model Context Protocol with Kiro for context-aware IDE workflows](#)
 - [EN] [Overcome development disarray with Kiro CLI custom agents](#)
- Build & Deploy
 - [EN] [Build AWS architecture diagrams using Kiro CLI and MCP](#)
 - [EN] [Enhance AI-assisted development with Amazon ECS, Amazon EKS and AWS Serverless MCP server](#)
 - [EN] [From sketch to deployed Full Stack AWS App](#)
 - [TH] [แนะนำการใช้ Kiro เป็นผู้ช่วย Platform Engineer ด้านการเขียนโค้ด และได้รับผลลัพธ์ที่ดีเกินคาด](#)
 - [EN] [Infrastructure as code translation for serverless using AI code assistants](#)
- Operation
 - [EN] [Streamline Operational Troubleshooting with Kiro CLI](#)
 - [EN] [Cloudwatch Log Root Cause Analysis](#)
 - [EN] [Analyze 24 hours periods of CloudTrail data](#)
 - [EN] [Unlocking the power of Kiro: Metrics-driven strategies for better AI coding](#)
 - [EN] [Kiro operational investigations in Amazon CloudWatch](#)
 - [EN] [MCP Servers | Context-Aware AI for Amazon EKS and ECS](#) - MCP Server: [EKS](#), [ECS](#), [Serverless](#)
- FinOps
 - [EN] [AWS costs estimation using Kiro CLI and AWS Cost Analysis MCP](#)
 - [EN] [AWS FinOps Dashboard](#) and [AWS FinOps MCP Server](#)
- Security
 - [EN] [Integration with SonarQube MCP](#)
 - [EN] [Secure Code with Kiro](#)
- Data Engineer
 - [EN] [Accelerate data engineering on AWS with Kiro](#)
- QA Engineer
 - [EN] [Kiro for browser automation](#)
 - [EN] [Testing your applications with Kiro](#)
- Transformation
 - [EN] [Kiro Java Upgrades: A Deep Dive into the New Selective Transformation Feature](#)
 - [EN] [AWS Transform for .NET, the first agentic AI service for modernizing .NET applications at scale](#)
