

Now you have a working AI-powered chatbot! As a product manager, you probably have ideas about how to make the UI design even better. This is your chance to get creative and build something amazing.

What You'll Learn

By completing this exercise, you will:

- **Unleash** your creativity to design a unique chatbot interface
- **Experience** the flexibility of frontend-only changes
- **Practice** product management and design thinking
- **Build** something uniquely yours with Kiro's help

Your Creative Challenge

Now it's time to make this chatbot truly yours! Instruct Kiro to make UI changes that reflect your vision. Here are some ideas to get you started, but feel free to use your imagination.

Simple Changes to Try

- **Application Name:** Give your chatbot a unique name and personality
- **Color Scheme:** Change background colors, chat bubbles, or accent colors
- **Header & Footer:** Add branding, navigation, or useful links
- **Typography:** Experiment with different fonts and text styles

More Creative Ideas

- **Themes:** Create a dark mode, nature theme, or futuristic design
- **Animations:** Add smooth transitions or loading animations
- **Chat Bubbles:** Design custom message styles or user avatars
- **Layout:** Reorganize elements or add sidebars
- **Branding:** Add logos, taglines, or company information

🔔 Frontend-Only Rule

The only rule is that changes should be made to the frontend only. Don't modify the backend API or Lambda function - the AI intelligence should continue working exactly as before.

Get Started

Tell Kiro what you want to build! Here's a simple way to start:

I want to customize my chatbot UI. Please help me make these changes:

[Describe your vision here - be as creative as you want!]

Remember to only modify the frontend files, not the backend API.

Need Inspiration?

Here are some creative directions you could explore:

Professional

Fun & Playful

Themed

Advanced

- Corporate branding with company colors
- Clean, minimalist design
- Professional typography and spacing
- Business-focused messaging

Work with Kiro

This is your creative playground! Work iteratively with Kiro:

1. **Start Simple:** Begin with basic changes like colors or text
2. **Get Feedback:** Ask Kiro to show you the results
3. **Iterate:** Make adjustments and try new ideas
4. **Be Bold:** Don't be afraid to experiment with creative designs
5. **Test Everything:** Make sure your changes work on different devices

Please show me how the updated design looks and let me test the chatbot functionality to make sure everything still works.

Success Criteria

Your customization is successful when:

- **✔ It Reflects Your Vision:** The design matches what you imagined
- **✔ Functionality Works:** All chat features continue working properly
- **✔ It Looks Professional:** The design is polished and user-friendly
- **✔ You're Proud of It:** You'd be excited to show this to others
- **✔ It's Responsive:** Works well on both desktop and mobile

Troubleshooting

If something doesn't work as expected:

► Changes Not Showing

► Design Looks Broken

► Mobile Issues

Show Off Your Creation

Once you're happy with your design, take a moment to appreciate what you've built! You now have:

- A **secure, scalable frontend** hosted on AWS
- A **serverless backend** that handles requests efficiently
- **AI intelligence** powered by Amazon Bedrock
- **Security features** protecting your application
- **Your unique design** that makes it truly yours

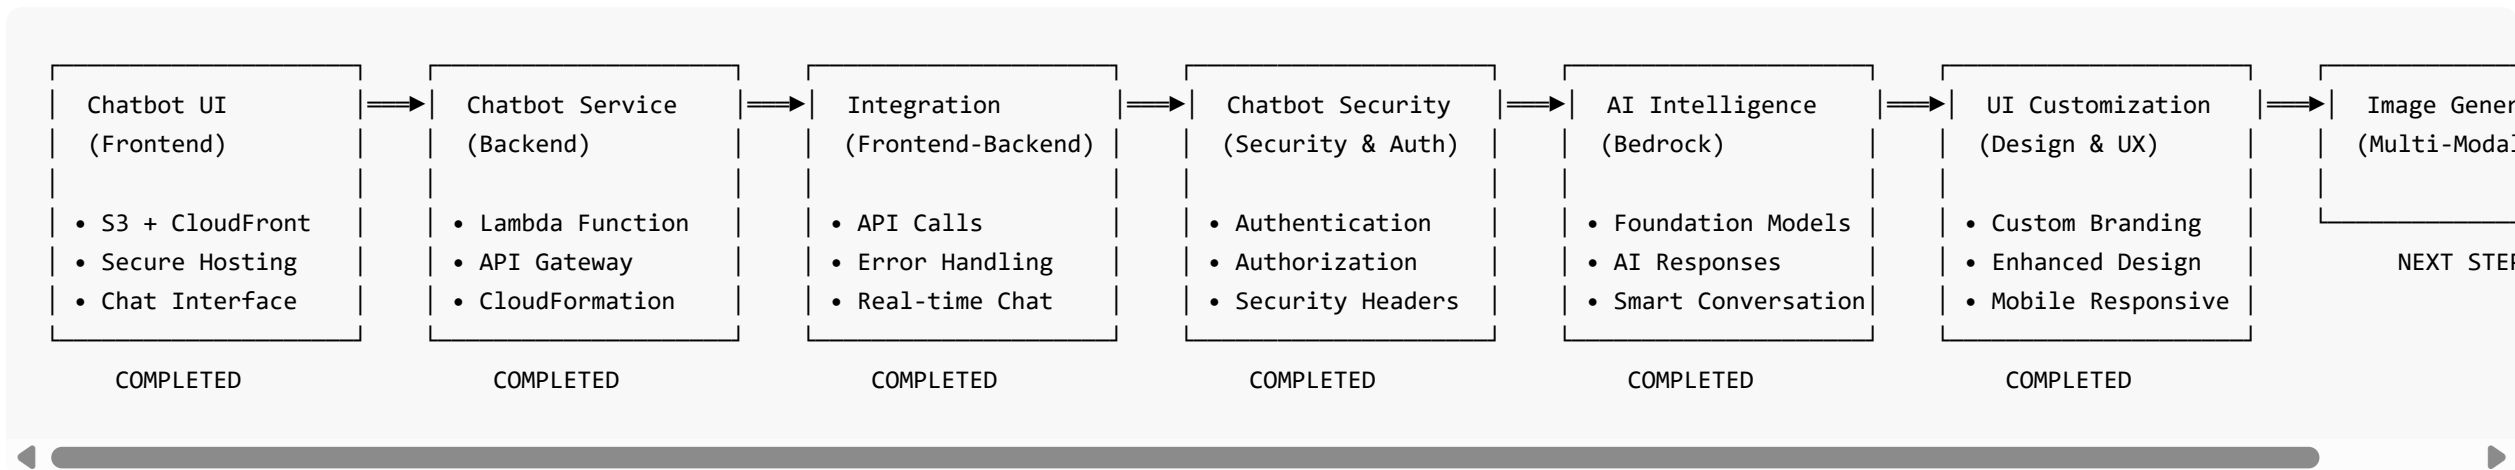

✔ Amazing Work!

You've transformed a basic chatbot into a personalized AI assistant with your own creative touch. This is the power of modern web development combined with your imagination!

Next Steps

Your chatbot now has a personalized, professional interface that reflects your creative vision. The next exercise will add exciting multi-modal capabilities by integrating image generation features.
